| Coating Articles with. (P) Ash, Gill, and Green. (xii, 1894).....                                | 401           |
| Coating Sheet, with Zinc. (P) Koller and Zuruzana. (v, 1886).....                                | 452           |
| Coating, with Aluminium. (P) Abel. From Gehring. (iv, 1885).....                                 | 225           |
| Coating Wood with. (P) Schroder and Perner. (vi, 1887).....                                      | 513           |
| Composition of White. (P) Mewburn. From La Société Raynaud Rechoide Gire et Cie. (i, 1882).....  | 72            |
| Compound for Deoxidising and Coating Metal Plates. (P) Lake. (iv, 1885).....                     | 225           |
| Compound to Prevent Decay of. (P) Gardner. From Lubinski. (v, 1886).....                         | 452           |
| Compounds, Apparatus for Separating, by Electrolysis. (P) Elmore. (v, 1886).....                 | 675           |
| Connecting, to Earthenware or China. (P) Brayson. (xiii, 1894).....                              | 811           |
| Depositing, on Glass, &c. (P) Erard and Round. (ix, 1890).....                                   | 624           |
| Deposition, Peculiar Case of. (Senderens.) (xiv, 1895).....                                      | 370           |
| Difference of Potential at the Contact of a, with its Salt. (Pellat.) (viii, 1889).....          | 550           |
| Electrical Treatment of. (P) Hoho and Legrange. (xii, 1893).....                                 | 526           |
| Electrically Heating or Working. (P) Thompson. From Collin. (xiii, 1894).....                    | 161           |
| Electro-deposition of, on Glass, &c. (P) Ford. From Pottier. (xi, 1892).....                     | 1007          |
| Enamelling. (P) Cochran. (xiv, 1895).....                                                        | 754           |
| Fibre, Manufacture of. (P) Torkington. (xi, 1892).....                                           | 614           |
| Films, Colours and Absorption Spectra of. (Dudley) (xi, 1892).....                               | 924           |
| Films, Producing Thin. (P) Endruveit. (xii, 1893).....                                           | 962           |
| From Iron Ores, Manufacture of. (P) Gardner. From Henderson. (vii, 1888).....                    | 125           |
| Galvanising Sheet. (P) Davies and Bayliss. (x, 1891).....                                        | 553           |
| Galvanising Sheet, and Apparatus therefor. (P) Thomas and Lewis. (vi, 1887).....                 | 511           |
| Homogeneous, Manufacture of. (P) Thompson. From Bertrand and Thiel. (xiv, 1895).....             | 10            |
| Industry of Hungary. (T.R.) (x, 1891).....                                                       | 806           |
| Joining Thin Pieces of. (P) Johnson. From Rogers. (viii, 1889).....                              | 802           |
| Mining in New Zealand. (T.R.) (xiv, 1895).....                                                   | 612           |
| New Light (Glucinum). (T.R.) (xiv, 1895).....                                                    | 998           |
| Plated Sheet. (Buchner.) (xii, 1893).....                                                        | 931           |
| Plates, Alloy for deoxidising. (P) Lake. From Jones. (iii, 1884).....                            | 322           |
| Plates, Apparatus for Coating. (P) Davis. (v, 1886).....                                         | 494           |
| Plates, Apparatus for Pickling. (P) Evans. (v, 1886).....                                        | 494           |
| Plates, Coating with Metals: (P) Thompson. From Levy. (ix, 1890).....                            | 867           |
| (P) Watkins. (xiii, 1894).....                                                                   | 1201          |
| Plates, Coating with Tin. (P) Morewood. (iii, 1884).....                                         | 572           |
| Plates, Fired Painting on. (P) Leroux and Fischbach. (viii, 1889).....                           | 204           |
| Plates, Wear of, by Action of Steam Jets. (Walter.) (xiii, 1894).....                            | 134           |
| Plating Articles with. (P) Piebler. (xiv, 1895).....                                             | 495           |
| Preparation of Nickel-plated Sheets of White. (P) Schröder. (i, 1882).....                       | 458           |
| Production in Austria-Hungary. (T.R.) (xiii, 1893).....                                          | 483           |
| Production of Germany. (T.R.) (xiii, 1893).....                                                  | 724           |
| Production of Mexico. (T.R.) (xii, 1893).....                                                    | 722           |
| Production of Russia. (T.R.) (ix, 1890).....                                                     | 567           |
| Production of United States, 1891-92. (T.R.) (xii, 1893).....                                    | 555           |
| Production of Yellow. (P) Parker. (iv, 1885).....                                                | 121           |
| Purification of Homogeneous. (P) Darby. (xi, 1892).....                                          | 42            |
| Recovery of, from Slag. (P) Maruhn. (vii, 1888).....                                             | 125           |
| Removing Gases and Impurities in Casting. (P) Sebenius. (xi, 1892).....                          | 923           |
| Salts, Dyeing Textiles with. (P) Odenheimer. (xi, 1892).....                                     | 161           |
| Separating Precious, from Liquid, Method and Apparatus for. (P) Rose and Dennes. (ix, 1890)..... | 519           |
| Sheet, Manufacture of. (P) Claus. (xi, 1892).....                                                | 922           |

## Metal—cont.

|-----------------------------------------------------------------------------------------------------------------------|----------|
| Sheets and Plates, Coating with Tin, &c. (P) Morewood. (v, 1886).....                                                 | 241      |
| Sheets, Apparatus for Coating, with Metals or Alloys. (P) Heathfield. (ix, 1890).....                                 | 336      |
| Sheets for Galvanising, Preparation of. (P) Davies Bros. and Co. and others. (xiv, 1895).....                         | 973      |
| Sheets, Prod. of, by Electricity. (P) Reynolds. (vii, 1888).....                                                      | 631      |
| Solubility of Type. (Schutze.) (vii, 1888).....                                                                       | 217      |
| Strips, App. for Galvanising. (P) Vibart. (ix, 1890).....                                                             | 949      |
| Structures, Experiments on Rusting of. (T.R.) (xiv, 1895).....                                                        | 701      |
| Trade of the United Kingdom. (T.R.) (xiv, 1895).....                                                                  | 86       |
| Treatment of White, in Basic Furnace. (Glehnst.) (x, 1891).....                                                       | 6        |
| Varnishing, in Light-resisting Colours. (P) Perl and Herrmann. (xii, 1894).....                                       | 1072     |
| Wires, Sheets, &c., Alloying surfaces of. (P) Martin. (xi, 1892).....                                                 | 924      |
| Wood, &c., Varnish for Coating. (P) Crane. From Hale. (vii, 1888).....                                                | 330      |
| Work, Use of Alloys in. (Roberts-Austen.) (ix, 1890).....                                                             | 740      |
| Zincing, Process and Appliances for. (P) Koller and Breden. (viii, 1889).....                                         | 400      |
| Metals, Acid Phosphates of the Alkali. (Amat.) (vii, 1888).....                                                       | 501      |
| Action of Caustic Soda on. (Venator.) (v, 1886).....                                                                  | 384      |
| Action of Concentrated Acids on certain. (Burch and Dalgson.) (xiii, 1894).....                                       | 525      |
| Action of Fatty Oils on. (Dunth.) (xiv, 1895).....                                                                    | 283      |
| Action of Gases and Vapours on the Noble. (Neumann.) (xii, 1893).....                                                 | 294      |
| Action of HCl and Oxygen on the Platinum. (Dudley.) (xii, 1894).....                                                  | 255      |
| Action of Meat Extracts on. (Ballard.) (x, 1891).....                                                                 | 379      |
| Action of Milk of Lime on. (Schmiedler.) (v, 1886).....                                                               | 493      |
| Action of Mineral Oils on. (Aismann.) (xiv, 1895).....                                                                | 811      |
| Action of Nitric Oxide on. (Emich.) (xiv, 1895).....                                                                  | 35       |
| Action of Oils on. (Redwood.) (v, 1886).....                                                                          | 562      |
| Action of, on Acid Solutions of their Chlorides. (Ditte and Metzner.) (xii, 1894).....                                | 43       |
| Action of, on India-Rubber. (Thomson and Lewis.) (x, 1891).....                                                       | 712      |
| Action of, on Nitric Acid: (Freer and Hiley.) (xii, 1893).....                                                        | 601      |
| (Hiley.) (xiv, 1895).....                                                                                             | 661      |
| Action of, on Oils. (Livaiche.) (ii, 1883).....                                                                       | 349      |
| Action of, on Salts Dissolved in Organic Liquids. (Varet.) (xi, 1892).....                                            | 713, 779 |
| Action of, on Sulphuric Acid. (Ditte.) (ix, 1890).....                                                                | 517      |
| Action of Salt Solutions of. (xi, 1892).....                                                                          | 704      |
| Action of Sulphurous Acid on. (1 hL.) (ix, 1890).....                                                                 | 802      |
| Adding Carbon to Liquid. (P) Colley. (vi, 1887).....                                                                  | 970      |
| Adhesion of, to Glass. (Marzot.) (xiv, 1895).....                                                                     | 1043     |
| Agents for Reducing. (Keller.) (xiv, 1895).....                                                                       | 753      |
| Alkali, Treatment of, at High Temperature. (P) Faure. (ii, 1883).....                                                 | 159      |
| Allotropic Transformations of. (Chastellier.) (x, 1891).....                                                          | 476      |
| Aluminium for Refining certain. (xiii, 1894).....                                                                     | 773      |
| And Alloys, Curious Properties of. (Roberts-Austen.) (viii, 1889).....                                                | 965      |
| And Alloys, Manufacture of. (P) Leithwaite. (iv, 1885).....                                                           | 52       |
| And Alloys, Purification of. (P) Torres. (xii, 1893).....                                                             | 286      |
| And Minerals of the United Kingdom. (T.R.) (viii, 1889).....                                                          | 845      |
| And Nitric Acid, Chemical Changes between. (Vebey.) (x, 1891).....                                                    | 841      |
| And Ores, App. for Separating. (P) Ferrari. (x, 1891).....                                                            | 204      |
| And Ores, Smelting. (P) Smyth. (iii, 1884).....                                                                       | 555      |
| And Sulphur, Electrolytic Decomposition of Compounds of. (P) And and Murray. From Siemens and Halske. (ix, 1893)..... | 640      |
| Annealing of. (Faure.) (ix, 1890).....                                                                                | 847      |
| Apparatus for Alloying. (P) Baldwin. (x, 1891).....                                                                   | 625      |
| Apparatus for Amalgamating: (P) Evans and Burkell. (xii, 1893).....                                                   | 776      |
| (P) Molloy. (vi, 1887).....                                                                                           | 273      |
| Apparatus for Casting, <i>in vacuo</i> . (P) Simpson. (xi, 1892).....                                                 | 735      |
| Apparatus for Coating with Lead, Tin, or other. (P) Taylor. (ix, 1890).....                                           | 823      |
| Apparatus for Coating, with Metals or Alloys. (P) Rogers and Player. (x, 1891).....                                   | 740      |
| Apparatus for Depositing. (P) Felt. (x, 1891).....                                                                    | 645      |
| Apparatus for Determining Melting Point of Easily Fusible. (Liebermann.) (i, 1882).....                               | 147      |
| Apparatus for Electrical Deposition of: (P) Alexander. (xiii, 1894).....                                              | 191      |
| (P) Perrill. (vii, 1888).....                                                                                         | 819      |
| Apparatus for Electrometallurgical Operations. (P) Hoepfner. (x, 1891).....                                           | 679      |
| App. for Electrolytic Estimation of. (Levoir.) (viii, 1889).....                                                      | 830      |
| Apparatus for Extraction of: (P) Cassel. (iii, 1884).....                                                             | 62       |
| (P) Chester. (x, 1891).....                                                                                           | 322      |
| (P) Consens. (ix, 1890).....                                                                                          | 260      |
| (P) Lake. From Vogelmann. (vii, 1888).....                                                                            | 627      |
| (P) Lebedeff. (x, 1891).....                                                                                          | 247      |
| (P) Thompson. From Brewster. (ix, 1890).....                                                                          | 217      |
| (P) Webb. (xi, 1892).....                                                                                             | 296      |
| Apparatus for Extraction of, by Electricity. (P) Tausig. (xiii, 1894).....                                            | 922      |
| Apparatus for Fusion and Purif. of. (P) Danton. (x, 1891).....                                                        | 403      |
| Apparatus for Hardening and Tempering. (P) Holland. (xii, 1893).....                                                  | 551      |
| Apparatus for Heating, by Liquid or Gaseous Fuel. (P) Rodger. (xi, 1892).....                                         | 526      |
|                                                                                                                       | 733      |

Metals—*cont.*

|---------------------------------------------------------------------------------------------------------------------------------------------|------|
| Apparatus for Making Sheets from Suitable. (P) Abel.<br>From Pousen. (iv, 1885).....                                                        | 122  |
| Apparatus for Manufacture of Alkali, by Electrolysis.<br>(Forchers.) (viii, 1891).....                                                      | 150  |
| Apparatus for Obtaining, by Electrolysis:<br>(P) Cassel. (v, 1886).....                                                                     | 151  |
| (P) Stouls. (ix, 1891).....                                                                                                                 | 158  |
| Apparatus for Obtaining Precious from Ores:<br>(P) Dennis and Rose. (ix, 1890).....                                                         | 167  |
| (P) Shill. (ix, 1890).....                                                                                                                  | 169  |
| Apparatus for Separating from Ores:<br>(P) Atkins. (xi, 1892).....                                                                          | 178  |
| (P) Lake. From White. (vi, 1887).....                                                                                                       | 371  |
| (P) Scott. (v, 1886).....                                                                                                                   | 431  |
| Apparatus for Separating from Ores, by Electricity. (P)<br>Atkins. (iv, 1890).....                                                          | 742  |
| Apparatus for Separation and Amalgamation of. (P) Wise.<br>From Walker. (ix, 1890).....                                                     | 1135 |
| Apparatus for Separation of, from Crushed Ores. (P)<br>Crawford. (ix, 1890).....                                                            | 396  |
| Apparatus for Treating, by Electricity. (P) Lake. From<br>Colby. (ix, 1890).....                                                            | 952  |
| Apparatus for Treating Ores to Obtain Precious. (P)<br>Young. (x, 1891).....                                                                | 260  |
| Apparatus for Withdrawing Molten, from Furnaces. (P)<br>Rylands and Horner. (x, 1891).....                                                  | 36   |
| Appliances for Recovery of, from Ores. (P) Fuller. (xiii,<br>1891).....                                                                     | 41   |
| As Amalgams, Electrolytic Determination of:<br>(Gibbs.) (xi, 1892).....                                                                     | 547  |
| (Vortmann.) (x, 1891).....                                                                                                                  | 1036 |
| Associated with Lead, Recovery of Precious. (P) Lyte.<br>(xii, 1893).....                                                                   | 155  |
| Behaviour of Hydrogen towards. (Neumann and Streintz.)<br>(xi, 1892).....                                                                   | 247  |
| Behaviour of the Alkali, at High Temperatures. (Dittmar.)<br>(vii, 1888).....                                                               | 730  |
| Carbonates of Alkali, Production of. (P) Lake. From<br>Kaysor, Williams, and Young. (vi, 1887).....                                         | 730  |
| Casting. (P) Huth. (xiv, 1895).....                                                                                                         | 871  |
| Cleaning, Method and App. for. (P) Vlasto. (vi, 1887).....                                                                                  | 823  |
| Coating Aluminium and Alloys with. (P) Legate. (xiv, 1895)<br>Coating of:.....                                                              | 808  |
| (P) Boulton. From Clark. (viii, 1880).....                                                                                                  | 802  |
| (P) Charnock. (ix, 1890).....                                                                                                               | 77   |
| (P) Norton. (xi, 1892).....                                                                                                                 | 923  |
| (P) Thompson. From Clamer. (x, 1891).....                                                                                                   | 704  |
| Coating or Cleaning. (P) Heathfield. (xi, 1892), 473;<br>(xii, 1893).....                                                                   | 526  |
| Coating, with a Metallic Alloy. (P) Thoms and Burgum.<br>(xiv, 1895).....                                                                   | 280  |
| Coating, with Adhesive Colours. (P) Loveland. (xiv, 1895)<br>Coating, with Aluminium. (P) Broadwell. (xiii, 1894).....                      | 1045 |
| Coating, with Cement. (P) Kellner. (x, 1891).....                                                                                           | 815  |
| Coating, with Tin:<br>(P) Bangerl. (xiv, 1895).....                                                                                         | 582  |
| (P) Barthel and Moller. (vii, 1888).....                                                                                                    | 326  |
| (P) Gutensohn. (vi, 1886).....                                                                                                              | 432  |
| (P) Morewood. (vii, 1888).....                                                                                                              | 36   |
| Coating, with Tin, Lead, or Terne. (P) Gutensohn.<br>(vi, 1885).....                                                                        | 225  |
| Coating, with Zinc Galvanically. (P) Lea and Hammond.<br>(vi, 1887).....                                                                    | 664  |
| Coating, without Electricity. (P) De Villiers. (ii, 1882).....                                                                              | 369  |
| Colorations of. (Barghauld.) (x, 1891).....                                                                                                 | 702  |
| Colours and Spectra of Incandescent Vapours of. (Dudley.)<br>(xi, 1892).....                                                                | 924  |
| Compensation for Protecting, from Rust. (P) Thompson.<br>From Solher and Burger. (xii, 1893).....                                           | 849  |
| Composition of. (P) Inch. (xiv, 1895).....                                                                                                  | 278  |
| Compound for Carburetting. (P) Brown. (xi, 1892).....                                                                                       | 616  |
| Compound for Preventing Pores in. (P) Burger and<br>Mannheimer. (x, 1891).....                                                              | 775  |
| Compound for Welding, &c. (P) Fisher. From Lord.<br>(viii, 1889).....                                                                       | 898  |
| Compounds of the Rare, Obtaining. (P) von Welsbach.<br>(v, 1886).....                                                                       | 522  |
| Compounds of, with Carbon Monoxide. (Wartlia.) (x, 1891)<br>Containing Oxygen, Reduction of. (P) Reichwald. From<br>Krupp. (xiv, 1895)..... | 837  |
| Crystalline State of. (Kahschner.) (ii, 1883).....                                                                                          | 283  |
| Cyanides of the Alkali, Manufacture of. (P) Huray.<br>From Goerlich and Wichmann. (xiv, 1895).....                                          | 571  |
| Decoxidising. (P) Jensen. From The Decoxidised Metal<br>Co. (vi, 1887).....                                                                 | 141  |
| Depolarising Electric Baths in Deposition of. (P) Clark.<br>From de Chanzy. (vii, 1889).....                                                | 32   |
| Depositing, from their Salts. (P) Beck. From Levy.<br>(vii, 1889).....                                                                      | 551  |
| Depositing, on Iron and Steel. (P) Levy. (viii, 1889).....                                                                                  | 957  |
| Deposition of. (P) Cowper-Coles and Walker. (xiii,<br>1894).....                                                                            | 1067 |
| Deposition of, by Electrolysis. (P) Cassen. (i, 1882).....                                                                                  | 236  |
| Desulphurising certain. (P) Rossignaux. (xi, 1892).....                                                                                     | 615  |
| Detection of, by Electrolysis. (Magencon.) (vi, 1887).....                                                                                  | 836  |
| Detection of, by Thiocetic Acid. (Schiff.) (xiv, 1895).....                                                                                 | 889  |
| Determination and Separation of, by Double Salts of<br>Pyrophosphoric Acid. (Brand.) (vii, 1889).....                                       | 1011 |
| Determination of Alkaline Earth, in Solutions. (De la<br>Harpe.) (iv, 1885).....                                                            | 510  |
| Determination of Iron Group of, by Hydrogen Peroxide.<br>(Carnot.) (viii, 1889).....                                                        | 138  |
| Determination of the Noble. (Opficus.) (vii, 1888).....                                                                                     | 103  |

Metals—*cont.*

|                                                                                                                                         |      |
|-----------------------------------------------------------------------------------------------------------------------------------------|------|
| Direct Production of, from their Ores. (Lebedeff.) (xi,<br>1892).....                                                                   | 245  |
| Disaggregation of Pyrites for Extraction of. (P) Boly.<br>(xiv, 1895).....                                                              | 973  |
| Dissociation of Alloyed. (P) Romiqueres. (viii, 1889).....                                                                              | 779  |
| Dissolving and Reducing Agent for, Manufacture of. (P)<br>Bernard. (ix, 1890).....                                                      | 1135 |
| Dry Extraction of. (P) Alzngary. (ix, 1890).....                                                                                        | 1041 |
| Effect of Annealing on the Properties of. (Le Chateher.)<br>(ix, 1890).....                                                             | 625  |
| Effect of Stress on Corrosion of. (Andrews.) (xiii, 1894).....                                                                          | 1209 |
| Effect of Stress on Electrical Properties of. (Gray and<br>Henderson.) (xiii, 1894).....                                                | 957  |
| Electric Reduction of. (P) Willson. (xi, 1892).....                                                                                     | 354  |
| Electric Reduction of, and Apparatus therefor.<br>(P) Willson. (x, 1891).....                                                           | 647  |
| Electro-deposition of:<br>(P) Bertrand. (xii, 1893).....                                                                                | 162  |
| (P) Heathfield and Rawson. (xiv, 1895).....                                                                                             | 874  |
| (P) Picard and Taniere. (xii, 1893).....                                                                                                | 163  |
| (P) Rudolph. (xii, 1894).....                                                                                                           | 529  |
| Electro-deposition of Heavy. (P) Thoms and Burgum.<br>(xiv, 1895).....                                                                  | 371  |
| Electro-fusion of. (P) Thwaite and Allen. (xiv, 1895).....                                                                              | 1049 |
| Electrolysis of. (P) Placet and Bonnet. (xii, 1893).....                                                                                | 161  |
| Electrolytic Production of. (P) Hoepfner. (viii, 1889), 401;<br>(xi, 1892), 535; (xii, 1894), 714                                       |      |
| Electrolytic Separation of:<br>(Freudenberg.) (xii, 1893).....                                                                          | 275  |
| (P) Johnson. From Pelatin and Clerici. (xiv, 1895).....                                                                                 | 810  |
| (Sloane.) (x, 1891).....                                                                                                                | 727  |
| (Smith and Spencer.) (xiv, 1895).....                                                                                                   | 190  |
| (Smith and Wallace.) (xiv, 1895).....                                                                                                   | 959  |
| Electrolytic Treatment of. (P) Watt. (x, 1891).....                                                                                     | 647  |
| Electrolytical Separation and Deposition of. (P) Clark.<br>From Moebius. (iv, 1885).....                                                | 751  |
| Electro-motive Force for Separation of. (Freudenberg.)<br>(xii, 1893).....                                                              | 816  |
| Enamel for:<br>(iv, 1885).....                                                                                                          | 596  |
| (P) Gehring. (x, 1891).....                                                                                                             | 1007 |
| (Petrik.) (x, 1891).....                                                                                                                | 138  |
| Enamelling. (P) Robinson and Wheatley. (x, 1891).....                                                                                   | 367  |
| Enamelling and Cementing of, Process for. (P) Erichsen.<br>(i, 1882).....                                                               | 154  |
| Estimation of Arsenic in. (Clark.) (x, 1891).....                                                                                       | 444  |
| Estimation of Free Acid in Solutions of Per-Salts of the<br>Heavy. (Hofmann.) (xiii, 1894).....                                         | 282  |
| Estimation of Manganese in, Methods for. (Saniter.)<br>(xii, 1894).....                                                                 | 112  |
| Extracting, by Amalgamation. (P) Fischer and Weber.<br>(iv, 1885).....                                                                  | 351  |
| Extracting, from Ironstone. (P) Miles. (iv, 1885).....                                                                                  | 224  |
| Extracting Precious, from their Ores:<br>(P) Abel. From Fischer and Weber. (vi, 1887).....                                              | 512  |
| (P) Crawford. (xiv, 1895).....                                                                                                          | 871  |
| (P) Dennis. (ix, 1890).....                                                                                                             | 519  |
| (P) Fischer and others. (xiv, 1895).....                                                                                                | 1047 |
| (P) Hamay..... (ix, 1890), 194; (xi, 1892), 248                                                                                         |      |
| (P) Huntington and Koch. (ii, 1883).....                                                                                                | 285  |
| (P) Martin and Pethybridge. (xi, 1892).....                                                                                             | 926  |
| (P) Morgans. (xiv, 1895).....                                                                                                           | 973  |
| (P) Rickard. (xi, 1892).....                                                                                                            | 533  |
| (P) Trivick. (ix, 1890).....                                                                                                            | 800  |
| (P) von Siemens. (xiv, 1895).....                                                                                                       | 875  |
| Extraction and Recovery of. (P) Schultze. (vii, 1888).....                                                                              | 388  |
| Extraction and Treatment of. (P) Lebedeff. (xi, 1892).....                                                                              | 923  |
| Extraction of:<br>(P) Chenhall. (xi, 1892).....                                                                                         | 924  |
| (P) Hood. (xiv, 1895).....                                                                                                              | 808  |
| (P) Jensen. From Russell. (vii, 1888).....                                                                                              | 504  |
| (P) Lebedeff. (x, 1891).....                                                                                                            | 838  |
| (P) Newerth. (xi, 1892).....                                                                                                            | 616  |
| (P) Shears. (viii, 1889).....                                                                                                           | 980  |
| (P) Turton. (xi, 1892).....                                                                                                             | 614  |
| Extraction of, from Alkaline Solution, &c. (P) Woods.<br>(viii, 1889).....                                                              | 989  |
| Extraction of, from Carbon. (P) Scott. (iv, 1885).....                                                                                  | 223  |
| Extraction of, from Complex Ores. (P) Thompson. From<br>Lewis. (iii, 1884).....                                                         | 261  |
| Extraction of, from Ores:<br>(P) Baill. (vii, 1888).....                                                                                | 570  |
| (P) Constable and Bingle. (vi, 1887).....                                                                                               | 512  |
| (P) Dennis and Rose. (ix, 1890).....                                                                                                    | 396  |
| (P) Johnson. From Lebedeff. (xii, 1893).....                                                                                            | 694  |
| (P) Jordan and Longden. (iii, 1884).....                                                                                                | 524  |
| (P) Lebedeff. (viii, 1889).....                                                                                                         | 802  |
| (P) Lewis and Phillips. (vii, 1888).....                                                                                                | 678  |
| (P) Nood, Mums and Stevens. (xi, 1892).....                                                                                             | 921  |
| (P) Paterson and Starke. (x, 1891).....                                                                                                 | 1010 |
| (P) Perkins. (xiv, 1895).....                                                                                                           | 370  |
| (P) Shedlock and Denny. (xi, 1892).....                                                                                                 | 695  |
| (P) Sulman and Teed. (xiv, 1895).....                                                                                                   | 870  |
| (P) Thompson. From Bonell and Gantier. (xiv,<br>1895).....                                                                              | 490  |
| Extraction of, from Ores, and Apparatus therefor:<br>(P) Jordan. (viii, 1889).....                                                      | 200  |
| (P) Welford. (ix, 1890).....                                                                                                            | 810  |
| Extraction of, from Ores, Slags, &c. (P) Fohr. (iii, 1884)<br>Extraction of, from Oxides and Sulphides. (P) Vautin.<br>(xiv, 1895)..... | 486  |
| Extraction of, from their Chlorides or Fluorides. (P)<br>Groth. From Gratzel. (iv, 1885).....                                           | 582  |
|                                                                                                                                         | 223  |

## Metals—cont.

## PAGE

|                                                                                                                      |          |
|----------------------------------------------------------------------------------------------------------------------|----------|
| Extraction of Precious, from Copper, and Apparatus therefor. (P) Haeghe and The Cape Copper Company. (ix, 1890)..... | 1134     |
| Extraction of Precious, from Sea-water. (Munster.) (xi, 1892).....                                                   | 351      |
| Extraction, Separation, and Refining of, by Electrolysis. (P) Tommasi. (xii, 1893).....                              | 768, 768 |
| Flux for Soldering. (P) Thompson. From Nicolai. (xiii, 1894).....                                                    | 890      |
| Fluxing Material for Treating. (P) Craven. (ix, 1890).....                                                           | 77       |
| For Ceramic Colours, Application of Rure. (xi, 1892).....                                                            | 523      |
| From Metal-bearing Bodies, Recovery of. (P) Loe. (xi, 1892).....                                                     | 351      |
| From Mixed Ores, Extraction of. (P) Cross and Wells. (iii, 1884).....                                                | 111      |
| From Nitrates, Production of. (P) Darling and Forrest. (xiii, 1894).....                                             | 647      |
| From Ores in the United Kingdom for 1888-89, Production of. (T.R.) (ix, 1890).....                                   | 781      |
| From Ores, Obtaining of:                                                                                             |          |
| (P) Nicholas. (vi, 1887).....                                                                                        | 823      |
| (P) Russell. (iii, 1884).....                                                                                        | 115      |
| From Ores, Production of. (P) MacArthur, Forrest, and Morton. (vi, 1887).....                                        | 600      |
| From Ores, Recovery of. (P) Campion and Tonison-Woods. (x, 1891).....                                                | 838      |
| From Refractory Ores. (P) Hall. (xiii, 1894).....                                                                    | 741      |
| From their Ores, Production of. (P) Berner. (xiii, 1894).....                                                        | 889      |
| From their Ores, Recovering. (P) Sulman. (xiv, 1895).....                                                            | 870      |
| From their Ores, Recovery of Precious. (P) Moldenhauer. (xii, 1893).....                                             | 48       |
| From their Ores, Reduction of:                                                                                       |          |
| (P) Clark. (ii, 1883).....                                                                                           | 479      |
| (Hartley.) (x, 1891).....                                                                                            | 197      |
| Furnace for Reducing. (P) Nawrocki. From Quaglio, Pintsch, and Lentz. (iii, 1884).....                               | 639      |
| Furnace for Smelting or Fusing. (P) Quaglio, Pintsch, and Lentz. (iv, 1885).....                                     | 503      |
| Furnaces for Heating or Melting. (P) Earler. (xii, 1893).....                                                        | 450      |
| Furnaces for Treating. (P) Swain. (ii, 1883).....                                                                    | 353      |
| Galvanising of, and Apparatus therefor. (P) Midgley and Nye. (viii, 1889).....                                       | 713      |
| Gilding. (P) Dode. (i, 1882).....                                                                                    | 192      |
| Glazing and Enamelling. (P) Ahern. (xiv, 1895).....                                                                  | 659      |
| In Alkaline Solution, Separation and Estimation of. Jannasch and Lesinsky. (xiii, 1894).....                         | 518      |
| In Australia. (T.R.) (xii, 1893).....                                                                                | 175      |
| In Commercial Copper, Determination of Foreign. (Hampe.) (xii, 1894).....                                            | 421      |
| In Drinking Water, Detection of. (Cooper.) (v, 1886).....                                                            | 84       |
| In Fatty Oils, Detection and Estimation of. (Fresenius and Schottenfroh.) (xiv, 1895).....                           | 895      |
| In Prussia in 1887, Production of. (T.R.) (vii, 1888).....                                                           | 651      |
| In Pulverulent Form, Production of. (P) Abel. From Elektrizitäts-Gesellschaft Gelnhausen. (xiv, 1895).....           | 339      |
| In Russia. (T.R.) (ix, 1890).....                                                                                    | 336      |
| In Russia, Production of. (T.R.) (viii, 1889).....                                                                   | 225      |
| In Sweden for 1888, Production of. (T.R.) (ix, 1890).....                                                            | 339      |
| Influence of, on Mixture of Acetylene and Air. (Bellamy.) (iv, 1885).....                                            | 668      |
| Influence of Temperature on Tensile Strength of. (Rudeloff.) (xii, 1894).....                                        | 520      |
| Interference of, in Assay of Gold Ores. (Buchanan.) (xiv, 1895).....                                                 | 1064     |
| Klein's Method of Shaping Electro-deposited. (Langbein.) (xiii, 1894).....                                           | 1205     |
| Leading, Process for. (P) Mohlan and Seimakenberg. (i, 1882).....                                                    | 458      |
| Liquid Polish for Cleaning. (P) King. (xi, 1892).....                                                                | 620      |
| Manufacture of, and Apparatus therefor. (P) Johnson. From Imbert and Julien. (x, 1891).....                          | 335      |
| Manufacture of, by Electrolysis. (P) Jensen. (v, 1886).....                                                          | 331      |
| Melting, by Electricity. (P) Krönsen. (xi, 1892).....                                                                | 1016     |
| Minerals, &c., Report on. (T.R.) (ix, 1890).....                                                                     | 1079     |
| Molten, Treating. (P) Uehling. (xiv, 1895).....                                                                      | 872      |
| Obtaining, by Electricity. (P) Thompson. From Cowles. (iv, 1885).....                                                | 679      |
| Obtaining, by Electrolysis:                                                                                          |          |
| (P) Elmore. (vi, 1887).....                                                                                          | 833      |
| (P) Wise. From Frei. (xii, 1893).....                                                                                | 689      |
| Obtaining, from their Solutions. (P) Sulman. (xiv, 1895).....                                                        | 870      |
| Of Alkalis or Alkali Earths, Alloys of. (P) Hulin. (xiv, 1895).....                                                  | 1019     |
| Of Hydrogen Sulphide Group, Quantitative Separation of. (Jannasch and Etz.) (xi, 1892).....                          | 710      |
| Of the Alkaline Earths, Manufacture of, and Apparatus therefor. (P) Lake. From Netto. (viii, 1889).....              | 122      |
| Of the Alkalies, App. for Obtaining. (P) Grabau. (ix, 1890).....                                                     | 1041     |
| Of the Earths and Alkaline Earths, Production of. (P) Feldmann. (viii, 1889).....                                    | 465      |
| Of the Platinum Group, Liquefaction of. (Machey.) (xii, 1893).....                                                   | 448      |
| Of the Second Group, Electrolytic Separation of. (Schmucker.) (xii, 1894).....                                       | 280      |
| Or Alloys, Removal of Gases from. (P) Selenius. (xi, 1890).....                                                      | 711      |
| Oxidation of the Alkali. (Holt and Sims.) (xiii, 1894).....                                                          | 526      |
| Oxides of Alkali, Mannf. of. (P) Castner. (xi, 1892).....                                                            | 1005     |

## Metals—cont.

## PAGE

|                                                                                                         |      |
|---------------------------------------------------------------------------------------------------------|------|
| Oxidising Action of Ammonia Solution on. (Hodgkinson and Bellars.) (xiv, 1895).....                     | 169  |
| Oxygen in. (Ledeblair.) (iv, 1885).....                                                                 | 677  |
| Paints for Protecting:                                                                                  |      |
| (P) Rieselmann. (i, 1882).....                                                                          | 449  |
| (P) Wells. (ii, 1883).....                                                                              | 287  |
| Pickling of. (P) Smith. (xiii, 1894).....                                                               | 526  |
| Plates, &c., of Combined, Manufacture of. (P) Abel. From Glaser. (xii, 1893).....                       | 451  |
| Plating, with Aluminium. (P) Brin. (viii, 1889).....                                                    | 548  |
| Polishing Powder for. (P) Storer. (ix, 1890).....                                                       | 84   |
| Polysulphides of the Alkali. (Böttger.) (iii, 1884).....                                                | 444  |
| Pot for Melting. (P) Harsant. (iv, 1885).....                                                           | 120  |
| Powder for Hardening. (P) Groth. From Beckstein. (vi, 1887).....                                        | 218  |
| Precipitating and Collecting, from Solutions. (P) Brooks. From Molloy. (xii, 1893).....                 | 362  |
| Precipitating Precious, from Solutions:                                                                 |      |
| (P) MacArthur. (xiv, 1895).....                                                                         | 369  |
| (P) Moldenhauer. (xiii, 1894).....                                                                      | 815  |
| Preparing Surfaces of, for Electro Deposits. (P) Elmore. (viii, 1889).....                              | 803  |
| Production of Alkali. (Castner.) (v, 1886).....                                                         | 601  |
| Production of, by Electricity. (P) Dymond from Lescuyer. (ix, 1890).....                                | 196  |
| Protecting, against Corrosion. (P) Paskin and Ackroyd. (xiv, 1895).....                                 | 757  |
| Purification of:                                                                                        |      |
| (P) Clark. From Edwards. (ii, 1883).....                                                                | 284  |
| (P) Pitt. From Harriet. (i, 1882).....                                                                  | 370  |
| Purification of, in Moulds. (P) Tauszig. (xiii, 1894).....                                              | 401  |
| Quantitative Analysis of Heavy. (Neumann.) (xiv, 1895).....                                             | 69   |
| Quantitative Separation of. (Jannasch and Lesinsky.) (xiii, 1894).....                                  | 67   |
| Ratio between Electric and Thermal Conductivities of. (Borget.) (ix, 1890).....                         | 520  |
| Recovery of. (P) Robson and Crowder. (xiv, 1895).....                                                   | 580  |
| Recovery of, from Copper Ore Mother-Liquors. (P) de Cuyper. (ix, 1890).....                             | 860  |
| Reduction of Nitrous Oxide by. (Sabatier and Senderens.) (xiv, 1895).....                               | 833  |
| Refining, and Apparatus therefor. (P) Allen. (xii, 1893).....                                           | 626  |
| Refining and Separating Precious. (P) Dode. (ix, 1890).....                                             | 810  |
| Refuse, Treating and Separating. (P) Woods. (vii, 1888).....                                            | 327  |
| Regulating Temperatures in Mannf. of. (P) Crompton. (vii, 1889).....                                    | 694  |
| Relation between Physical Properties and Chemical Functions of. (Blake.) (i, 1882).....                 | 173  |
| Removal of Impurities in Ingots of Malleable. (P) Dyer. (ii, 1883).....                                 | 416  |
| Removing Tin from. (P) Reinecken and Poensen. (ii, 1883).....                                           | 284  |
| Rendering, Homogeneous. (P) Friley. (xi, 1892).....                                                     | 695  |
| Replacement of, by alloyable, Solutions in Voltaic Combinations. (Wright and Thompson.) (vi, 1887)..... | 604  |
| Researches in the Reduction of Difficult. (Rozers.) (ix, 1890).....                                     | 519  |
| Roasting Ores for Extracting, and Apparatus therefor. (P) Frivick. (ix, 1890).....                      | 353  |
| Rust-preventive Compositions for. (Reichelmann.) (i, 1882).....                                         | 333  |
| Separating. (P) Mays. (xiii, 1894).....                                                                 | 740  |
| Separating Alkali and Earthy, from Salts. (P) Atkins and Applezarth. (xi, 1892).....                    | 43   |
| Separating and Purifying. (P) Mays. (xiii, 1894).....                                                   | 815  |
| Separating, from Ores:                                                                                  |      |
| (P) Besmelfelder. (xiii, 1894).....                                                                     | 815  |
| (P) Johnson. From Auel and Thodier. (ii, 1883).....                                                     | 479  |
| (P) Lake. From Marchese. (ii, 1883).....                                                                | 43   |
| (P) Mays. (iv, 1885).....                                                                               | 352  |
| (P) Parnell. (v, 1886).....                                                                             | 382  |
| (P) Scott. (ii, 1883).....                                                                              | 479  |
| (P) Stantfield and Clarkson. (ix, 1890).....                                                            | 194  |
| Separating, from Ores, and Treatment of. (P) Quen in and Brin. (v, 1886).....                           | 101  |
| Separating, from Slaz, &c. (P) Lake. From Peck. (viii, 1889).....                                       | 201  |
| Separating, from their Alloys. (P) Sherlock. (v, 1886).....                                             | 246  |
| Separating Precious, from their Ores, and Apparatus therefor. (P) Tripler. (vii, 1888).....             | 326  |
| Separating the Precious, from Lead:                                                                     |      |
| (P) Greenway. (vi, 1887).....                                                                           | 43   |
| (P) Rosing. (xi, 1892).....                                                                             | 694  |
| (P) Russell. (iv, 1885).....                                                                            | 122  |
| Separation and Refining of, and Apparatus therefor. (P) Lake. From Hayden. (vii, 1888).....             | 330  |
| Separation of Arsenic, Tin, &c., from other. (Jannasch.) (xiv, 1895).....                               | 510  |
| Separation of, by Electrolysis. (P) Oliver. (xiv, 1895).....                                            | 281  |
| Separation of, by Hydrogen Peroxide. (Jannasch and Rottgen.) (xiv, 1895).....                           | 508  |
| Separation of, by Hydrogen Peroxide. (Jannasch and Rose.) (xiii, 1894).....                             | 1224 |
| Separation of, by Magnetism. (P) Maxim. (vi, 1887).....                                                 | 575  |
| Separation of, from Blendes. (P) Roux and Desmazures. (xiv, 1895).....                                  | 369  |
| Separation of, from Scups, &c. (P) Fursac, Moisset, and Very. (xiii, 1894).....                         | 400  |

Metals—*cont.*

|                                                                                                   |          |
|---------------------------------------------------------------------------------------------------|----------|
| Separation of, from their Dilute Solutions. (Mylius and Fromm.) (xii, 1894)                       | 527      |
| Separation of, in Alkaline Solution. (Jannasch and Kammerer.) (xiv, 1895)                         | 880      |
| Separation of, Method and Apparatus for. (P) Moebius. (xiv, 1895)                                 | 371      |
| Separation of Precious, from Ores. (P) Contarini. (vii, 1888)                                     | 570      |
| Separation of, Precipitated by Sulphuretted Hydrogen. (Antoni and Niccoli.) (xii, 1893)           | 866      |
| Separation of Zinc from the Group. (Hampe.) (iv, 1885)                                            | 419      |
| Separators for Extracting, from Slag. (P) Askham and Wilson. (x, 1891)                            | 706      |
| Smelling of Sulphurets or Sulphides of. (P) Prince. From Dixon and others. (xii, 1893)            | 1041     |
| Sodium Pyrophosphate for Estimation and Separation of. (Vortmann.) (vii, 1888)                    | 401      |
| Solder for Soldering. (P) Nicholai. (xiii, 1894)                                                  | 645      |
| Soldering Aluminium Plates to other. (P) Thompson. From Laud. (x, 1891)                           | 262      |
| Soldering, New Method of. (Novel.) (xii, 1893)                                                    | 841      |
| Solubility of Salts of the Heavy, in Sugar Solution. (Stern and Frankel.) (xii, 1893)             | 1067     |
| Solution for Coating, with Lead. (P) Clark. From Horgan. (x, 1891)                                | 704      |
| Solutions for Colouring. (Pensky.) (vii, 1888)                                                    | 753      |
| Sulphates of, from Oxides, Obtaining. (P) Graham. (vi, 1887)                                      | 217      |
| Sulphides and Oxides of, Treating. (P) Knowles. (iv, 1885)                                        | 223      |
| Surfacing. (P) Thompson. From Kiesel. (xii, 1894)                                                 | 42       |
| Sweep-smelting of. (Bettel.) (xii, 1894)                                                          | 953      |
| Tempering and Hardening. (P) Damm. (vi, 1892)                                                     | 1014     |
| The Platinum. (vii, 1889)                                                                         | 710      |
| Treatment of. (P) Clark. From Clemand. (i, 1882)                                                  | 410      |
| Treatment of Compound Ores containing. (P) Mills. From Manhes. (iv, 1885)                         | 120      |
| Treatment of finely-divided Ore containing Precious. (P) Raleigh. (xii, 1894)                     | 401      |
| Treatment of Lead for Coating. (P) Justice. From Chamer. (ii, 1884)                               | 180      |
| Treatment of Ores for Extraction of. (P) Sulman. (xiv, 1895)                                      | 369      |
| Use of Aluminium for Refining. (T.R.) (xiv, 1895)                                                 | 208      |
| (Faucan.) (xv, 1895)                                                                              | 276      |
| Vessels for Electrolytic Separation of. (P) Newbury. From Horing and Gorchers. (xiv, 1895)        | 975      |
| Vessels for Galvanising, Tinning, or Coating. (P) Luther. (v, 1886)                               | 101      |
| Waterproof Coating for. (P) Prudman. (ix, 1890)                                                   | 745      |
| Welding, Soldering, and Brazing of, and Apparatus therefor. (P) Lake. From Thompson. (viii, 1889) | 802      |
| Which can be determined by Electrolysis. (Kohn and Wedgates.) (viii, 1889)                        | 257      |
| Working and Welding of, by Electricity. (P) Longsdon. From Krupp. (xii, 1893)                     | 847      |
| Working of, by Electricity. (P) Remardis and Olszewski. (v, 1886)                                 | 675      |
| World's Production of Noble. (T.R.) (xiii, 1894)                                                  | 676      |
| Metallic Compounds, Electric Smelting of Refractory. (P) Wilson. (xii, 1893)                      | 923      |
| Compounds, Manufacture of. (P) Radford. (iv, 1885)                                                | 351      |
| Deposits, Method of Producing. (Gottig.) (xii, 1894)                                              | 1200     |
| Deposits, Production of Easily Separable. (P) Netto and others. (xii, 1893)                       | 768      |
| Etching for Producing Designs in Relief and Colours. (P) Piper. (v, 1886)                         | 102      |
| Powders, Manufacture of Coated. (P) Murray. From Sachs. (xii, 1894)                               | 893, 958 |
| Reducing Agents. (Keller.) (xiv, 1895)                                                            | 271      |
| Residues, Recovering Tin from. (P) Rembeck. (iv, 1885)                                            | 406      |
| Substances, App. for Separating. (P) Peck. (x, 1891)                                              | 451      |
| Substances, App. for Treating. (P) Peck. (x, 1891)                                                | 775      |
| Surfaces, Coating with Metals or Alloys. (P) Stuart and Binney. (vi, 1887)                        | 823      |
| Surfaces, Electro-nickelling of. (xiii, 1894)                                                     | 1204     |
| Surfaces, Plating. (P) Marino. (xiii, 1894)                                                       | 958      |
| Surfaces, Producing Designs on. (P) Haddan. From von Chelmicki. (vi, 1887)                        | 517      |
| Metallisation, Prep. of Org. Mat. for. (P) Bonit. (vi, 1887)                                      | 223      |
| Metalloids, Purification of Iron from the. (P) Jensen. From de Montblanc and Gaulard. (i, 1882)   | 235      |
| Removal of, in Basic Furnaces. (Harbord.) (v, 1886)                                               | 605      |
| Separating, from their Ores. (P) Lake. From Marchese. (ii, 1883)                                  | 43       |
| Metallurgical and Chemical Production of Italy in 1890. (T.R.) (xi, 1892)                         | 649      |
| Furnaces. (P) King. From Bissell. (iii, 1884)                                                     | 418      |
| Industries of South America. (T.R.) (xi, 1892)                                                    | 783      |
| Industries of Spain. (T.R.) (xiv, 1895)                                                           | 402      |
| Industries of the United States. (Martyn.) (iv, 1885)                                             | 26       |
| Industry in Russia, Development of. (T.R.) (xiv, 1895)                                            | 402      |
| Operations. (iv, 1885)                                                                            | 54       |
| Output of Austria. (T.R.) (xi, 1892)                                                              | 853      |
| Practice, Progress in. (iv, 1885)                                                                 | 404      |
| Science, Siemens Medal for. (i, 1882)                                                             | 346      |

| Industry, Progress in the. (Holde.) (xiv, 1895).....                                                                    | 262      |
| Lighting Oil from Caucasian, Preparation of. (Mendeleeff.) (ii, 1883).....                                              | 238      |
| Manufacture of Hydrocarbons from. (P) Nikiforoff. (vi, 1887).....                                                       | 540      |
| -Oils for Lighting Purposes. (Lissenko.) (ix, 1890).....                                                                | 381      |
| Process of Extracting Oils. (P) Evans. (x, 1891).....                                                                   | 471      |
| Products, Alkali Test for. (Lassenko and Stepanow.) (xiii, 1894).....                                                   | 177      |
| Proposed Pipe Line for, in Russia. (T.R.) (vii, 1888).....                                                              | 631      |
| Residuum as Fuel. (T.R.) (vii, 1888).....                                                                               | 561      |
| -Soap, Production of. (P) Stanton. (xii, 1893).....                                                                     | 772      |
| -Tar, Alexeev's Apparatus for Treating. (x, 1891).....                                                                  | 246      |
| Trade of Russia. (T.R.) (xi, 1892).....                                                                                 | 783      |
| Union in Russia, Formation of. (T.R.) (xii, 1893).....                                                                  | 1073     |
| Wood-. (Fawsitt.) (ix, 1885).....                                                                                       | 319      |
| Naphthas, Estimation of Carbon Bisulphide in Crude. (Holland and Phillips.) (iii, 1884).....                            | 295      |
| Valuation of Crude Commercial. (Davis.) (iv, 1885).....                                                                 | 645, 719 |
| Naphthalens of Substituted Amidophenols. (Ulzer and Holler.) (xiii, 1894).....                                          | 799      |
| Naphthalene, Acidimetric Estim. of. (Kuster.) (xiii, 1894).....                                                         | 844      |
| Action of Chloroform upon. (Hong and Berger.) (i, 1882).....                                                            | 443      |
| Action of Iodine on, at High Temperature. (Blennard and Vran.) (i, 1882).....                                           | 180      |
| $\alpha$ - and $\beta$ -Dichloro-. (Widman.) (i, 1882).....                                                             | 443      |
| $\alpha$ -Bromodinitro-, Higher Nitration of. (Merz and Weith.) (i, 1882).....                                          | 432      |
| Alpha-sulphonic Acid of, for Purifying Hides. (Burns and Hull.) (xi, 1892).....                                         | 18       |
| And $\alpha$ - or $\beta$ -Naphthol, Tests to Distinguish. (Reuter.) (x, 1891).....                                     | 739      |
| And Clay, Porous Earthenware from Mixture of. (P) Stein. (iii, 1884).....                                               | 109      |
| And Stearic Acid, Solidifying Point of Mixtures of. (Courtonne.) (i, 1882).....                                         | 508      |
| Appearance of, in Gasworks. (iii, 1884).....                                                                            | 158      |
| Benzene and Toluene-azos. (Nietzki and Zehnter.) (xii, 1893).....                                                       | 350      |
| $\beta$ -Series, Compounds of the. (Meldola and East.) (vii, 1888).....                                                 | 617      |
| Bromo-, Action of Fuming Nitric Acid on. (Merz and Weith.) (i, 1882).....                                               | 431      |
| Causes of Deposit of. (Kunth.) (x, 1891).....                                                                           | 391      |
| Colouring Matter, Manufacture of Sulpho-Acids of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891)..... | 831, 831 |
| Colouring Matters from, Manufacture of New. (P) Johnson. From The Badische Anilin und Soda Fabrik. (xiii, 1894).....    | 630      |
| Colours, Uses of. (Waescher.) (i, 1882).....                                                                            | 147      |
| Constitution of the Tri-Derivatives of. (Armstrong and Wynne.) (ix, 1890), 283, 284, 799; (x, 1891).....                | 218      |
| Derivatives. (Witt.) (vii, 1888).....                                                                                   | 317      |
| Derivatives, Manufacture of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891).....                      | 762      |
| Derivatives, Production of Sulpho-Acids of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (xii, 1894).....     | 144      |
| Derivatives, Sulphonations of. (Dressel and Kothe.) (xii, 1894).....                                                    | 875      |
| Diamido-, Characteristics of. (Grüss.) (i, 1882).....                                                                   | 445      |
| Dihydroxy-, A New. (Claus.) (vii, 1889).....                                                                            | 535      |
| Dimethyl-. (Emmert and Reingruber.) (i, 1882).....                                                                      | 143, 397 |
| Dioxy-. (Weber.) (i, 1882).....                                                                                         | 100      |
| -1:3-Disulphonic Acid, Action of Potash on. (Armstrong and Wynne.) (ix, 1890).....                                      | 803      |
| Dyestuff, Manufacture of Sulpho-Acids of. (P) Johnson. From The Badische Anilin und Soda Fabrik. (vii, 1889).....       | 877      |
| Ethyl-, and its Derivatives. (Marchetti.) (i, 1882).....                                                                | 220      |
| Exemption of, from Import Duty in the Netherlands. (T.R.) (xiii, 1894).....                                             | 847      |
| Extraction of, from Coal-tar. (P) Clark. (xiii, 1894).....                                                              | 797      |
| For Illuminating Purposes, Obtaining. (P) Livesey and Kid. (i, 1882).....                                               | 315      |
| Manufacture of, and Apparatus. (P) Fenner. (vii, 1888).....                                                             | 741      |
| Manufacture of, from Naphtha. (P) Nikiforoff. (vi, 1887).....                                                           | 540      |
| Method of Obtaining. (ii, 1883).....                                                                                    | 128      |
| Moulds for Casting Slabs of. (P) Fleming's Oil Co. and Fenner. (vii, 1889).....                                         | 875      |
| Nitro-Derivatives of. (Metz and Weith.) (i, 1882).....                                                                  | 431      |

| (Fischer.) (vii, 1888).....                                                                                                         | 226  |
| $\beta$ -, and Benzaldehyde, Condensation Product of. (Trzinsky.) (iii, 1884).....                                                  | 246  |
| $\beta$ -, Oxidation of. (Ehrlich.) (viii, 1889).....                                                                               | 456  |
| $\beta$ -, Oxidation of, to Orthoicinnamicarboxylic Acid. (Ehrlich and Benedikt.) (vii, 1888).....                                  | 671  |
| $\alpha$ -, $\beta$ -Sulphonic Acid. (Claus and Kuyrim.) (v, 1886).....                                                             | 28   |
| Carbonic Alkaline Salts, Production of. (P) Kolbe and Rentsch. (iv, 1885).....                                                      | 531  |
| Combining Diazo Compounds with. (P) Clark. From Krügener and Farbfabrik vormals Brönnner. (iv, 1885).....                           | 400  |
| Compounds, (Desesquelle.) (xiii, 1894).....                                                                                         | 835  |
| Condensation Derivatives of $\beta$ -. (Gaess and Elsasser.) (xii, 1893).....                                                       | 749  |
| Derivatives, Action of Nitric Acid on. (Armstrong and Rossiter.) (x, 1891).....                                                     | 693  |
| Derivatives of $\alpha$ -. (Noelting and Grandmougin.) (x, 1891).....                                                               | 756  |
| Derivatives of $\alpha$ - and $\beta$ -. (Friedlander.) (iii, 1884).....                                                            | 163  |
| (Reverdin and de la Harpe.) (xi, 1892).....                                                                                         | 997  |
| Derivatives of Sulphonic Acids of $\beta$ -. (Levinstein.) (ii, 1883).....                                                          | 83   |
| Diazo Derivatives of $\alpha$ -. (Noelting and Grandmougin.) (x, 1891).....                                                         | 756  |
| Dinitro- $\beta$ -, Constitution of. (Loewe.) (ix, 1890).....                                                                       | 1028 |
| Green, Manufacture of. (P) Gans and Co. (iv, 1885).....                                                                             | 204  |
| Higher Homologues of, Manufacture of. (P) Liebmann. (i, 1882).....                                                                  | 102  |
| Monosulpho-Acid of $\alpha$ -, Production of. (P) Liebmann and Studer. (vii, 1888).....                                             | 431  |
| Monosulphonic Acid of $\beta$ -. (P) Badische Anilin und Soda Fabrik. (ii, 1883).....                                               | 275  |
| Monosulphonic Acid of $\beta$ -, Manufacture of Colouring Matters from. (P) Bayer and Co. (ii, 1883).....                           | 172  |
| Monosulphonic Acid of $\beta$ -, Preparation of Colouring Matters from. (P) Farbenfabriken vormals Bayer and Co. (i, 1882).....     | 224  |
| Nitroso- $\beta$ -, Applic. of, in Analysis. (Knorre.) (vi, 1887).....                                                              | 384  |
| Nitroso- $\beta$ -, Use of, in Quantitative Analysis. (viii, 1889).....                                                             | 819  |
| (Knorre.) (xii, 1893).....                                                                                                          | 711  |
| (Schleier.) (xi, 1892).....                                                                                                         | 713  |
| Reactions for. (Wolff.) (xiv, 1895).....                                                                                            | 599  |
| Soluble Derivative of $\beta$ -. (Dujardin-Beaumetz and Stackler.) (xii, 1893).....                                                 | 781  |
| Sulphonic Acids of $\alpha$ -, Investigations on. (Conrad and Fischer.) (xii, 1893).....                                            | 749  |
| Thio Derivatives of $\beta$ -. (Schiller-Wechsler.) (xiv, 1895).....                                                                | 505  |
| Toilet Soaps containing. (Bohm.) (ii, 1883).....                                                                                    | 182  |
| Naphthols. (McMurtre.) (xiv, 1895).....                                                                                             | 1074 |
| Introqueing Benzene Residue into Nucleus of. (P) Liebmann. (i, 1882).....                                                           | 492  |
| Nitroso-, Compounds of, with Iron and Cobalt. (Hoffmann.) (iv, 1885).....                                                           | 278  |
| Nitroso-, Preparation of. (Henriques and Ilinski.) (iv, 1885).....                                                                  | 338  |
| Preparation of. (P) Actiengesellschaft für Anilinfabrikation. (i, 1882).....                                                        | 226  |
| Naphtholbidiazobenzene, $\alpha$ -. (Krohn.) (viii, 1889).....                                                                      | 116  |
| Naphtholdisulpho Acid, Amido-2:7-. Manufacture of. (P) Abel. From The Actien Gesellschaft für Anilin Fabrikation. (xiii, 1894)..... | 876  |
| Acid, Amido-, Manufacture of. (P) Newton. From The Farbenfabriken vormals Bayer and Co. (xiii, 1894).....                           | 943  |
| Acid, Perchloro-, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....                                                   | 32   |
| Acid, Production of $\alpha$ -. (P) Lake. From Leonhardt. (vii, 1888).....                                                          | 672  |

| In Chili, Production and Exports of. (T.R.) (vi, 1887).....                                                               | 529      |
| Industry in Chili in 1888. (T.R.) (viii, 1889).....                                                                       | 427      |
| Of Soda in Egypt. (Mackenzie.) (xiii, 1894).....                                                                          | 611      |
| Of Soda, Statistics of. (T.R.) (xii, 1891).....                                                                           | 81       |
| Properties in Chili, Sale of the Government. (T.R.) (xii, 1893).....                                                      | 189      |
| Revenue in Chili. (T.R.) (xi, 1892).....                                                                                  | 380      |
| Statistics of the United States. (T.R.) (viii, 1889).....                                                                 | 152      |
| Trade of Chili. (T.R.) (ix, 1890).....                                                                                    | 664      |
| Nitrates, Absence of, in Forest Trees. (Ebermeyer.) (viii, 1889).....                                                     | 292      |
| Action of, on Alkali Sulphides. (Parnell.)..... (i, 1882), 133; (iii, 1884), 138                                          |          |
| Action of, on Iron and Sulphides. (Lunge.) (iii, 1884).....                                                               | 287      |
| Action of Superphosphates on. (Andouard.) (vi, 1887).....                                                                 | 551      |
| And Cereals, Investigations on. (Pitsch and Campanze.) (vi, 1887).....                                                    | 836      |
| And Nitrates. (Smith.) (vi, 1887).....                                                                                    | 679      |
| And Nitrates, Estimation of, in Water. (Ormandy and Cohen.) (ix, 1890).....                                               | 973      |
| And other Chemicals, Comparative Antiseptic Values of. (Kinzett.) (vii, 1888).....                                        | 704      |
| Antiseptic Value of. (Kinzett.) (vi, 1887).....                                                                           | 712      |
| Apparatus for Estimation of, by Schulze-Tiemann's Method. (Scheidt.) (ix, 1890).....                                      | 896      |
| Basic Bismuth. (Carles.) (xiv, 1895).....                                                                                 | 183      |
| Conversion of, into Organic Matter in the Soil. (Berthelot.) (vi, 1888).....                                              | 577      |
| Detection of. (Porbes.) (x, 1891).....                                                                                    | 1035     |
| Detection of, in Soils:                                                                                                   |          |
| (Frank.) (viii, 1889).....                                                                                                | 420      |
| (Kreusler.) (viii, 1889).....                                                                                             | 306      |
| Determination of Nitrogen in:                                                                                             |          |
| (Schenke.) (xii, 1893).....                                                                                               | 1063     |
| (Stoklasa.) (xii, 1893).....                                                                                              | 711      |
| (Sullwald.) (x, 1891).....                                                                                                | 164, 164 |
| Diphenylamine and Crystallised Phenol as Reagents for. (Hager.) (iv, 1885).....                                           | 613      |
| Electrolysis of. (P) Harzeaves and Bird. (xiii, 1894).....                                                                | 886, 886 |
| Estimation of:                                                                                                            |          |
| (Ruffe.) (ii, 1883).....                                                                                                  | 21       |
| (Wright.) (ii, 1883).....                                                                                                 | 122      |
| Estim. of, by Kjeldahl's Method. (Foerster.) (viii, 1889).....                                                            | 921      |

## Nitrates—cont.

|                                                                                                              |          |
|--------------------------------------------------------------------------------------------------------------|----------|
| Estimation of, by the Nitrometer. (Heury.) (xiii, 1894) .....                                                | 763      |
| Estimation of, in Manures. (Schmitt.) (ix, 1890) .....                                                       | 1154     |
| Estimation of, in Natural Water. (Hooker.) (viii, 1889) .....                                                | 138      |
| Estimation of, in Potable Waters. (Harrow.) (x, 1891) .....                                                  | 727      |
| Estimation of Nitrogen in:                                                                                   |          |
| (Arnold and Wedemeyer.) (xii, 1893) .....                                                                    | 183      |
| (Chenot.) (vi, 1892) .....                                                                                   | 943      |
| (Devarda.) (xii, 1893) .....                                                                                 | 550      |
| (Jodlbauer.) (v, 1886) .....                                                                                 | 510      |
| Estimation of Nitrogen in Gunno containing. (Konig.)                                                         |          |
| (i, 1882) .....                                                                                              | 464      |
| Export of, by Chili. (T.R.) (x, 1891) .....                                                                  | 75       |
| Fermentation of, (Gayon and Dupetit.) (i, 1882) .....                                                        | 486      |
| Formation of Ammonia from. (Loew.) (ix, 1890) .....                                                          | 634      |
| Formation of, in the Higher Plants. (Schulze.) (vi, 1887) .....                                              | 601      |
| Formation of, in the Soil. (Muntz.) (x, 1891) .....                                                          | 812      |
| From Jute Fibre, Explosive. (Cross and Bevan.) (xi, 1892) .....                                              | 211      |
| Gas Volum. Determin. of Nitrogen in. (Guntter.) (xiv, 1895) .....                                            | 770      |
| In Arable Land, Reduction of. (Deherain and Maquenne.) (i, 1882), 511, 511; (iii, 1884) .....                | 185      |
| In Egypt. (T.R.) (xiii, 1894) .....                                                                          | 1236     |
| In Potable Water, Determination of:                                                                          |          |
| (Gill.) (viii, 1889) .....                                                                                   | 509      |
| (Riedel.) (viii, 1889) .....                                                                                 | 1010     |
| In Rain of Tropical Regions. (Muntz and Mareau.) (viii, 1889) .....                                          | 627      |
| In Soils, Error in Estimation of. (Gautti.) (viii, 1889) .....                                               | 572      |
| In Water, Error in Determin. of. (Bartram.) (x, 1891) .....                                                  | 351      |
| In Waters, Estimation of. (Fraser.) (xiii, 1894) .....                                                       | 1005     |
| Nitric Acid and Metals from. (P) Darling and Forrest. (xiii, 1894) .....                                     | 647      |
| Occurrence of, in the Vegetable Kingdom. (Berthelot.) (ii, 1884) .....                                       | 576      |
| Of South Africa. (T.R.) (xiv, 1895) .....                                                                    | 207      |
| Process for Obtaining. (P) Hugoeburg. (vii, 1888) .....                                                      | 673      |
| Recovery of, in Sugar Factories. (xiii, 1894) .....                                                          | 719      |
| Reduction of, by Ferments. (Sprunzer.) (ii, 1885) .....                                                      | 346      |
| Test for. (Hager.) (iii, 1884) .....                                                                         | 533      |
| Yearly Prod. of, from 1884 to 1888. (T.R.) (viii, 1889) .....                                                | 830      |
| Nitrating Apparatus. (P) Selwig and Lange. (xi, 1892) .....                                                  | 635      |
| Nitration under Varying Conditions. (Noelting and Collin.) (iv, 1885) .....                                  | 309      |
| Nitric Acid and Sulphates, Utilising. (P) Darling. (xiv, 1895) .....                                         | 866      |
| Nitric Deposit in Tarapaca. (Dampsky.) (vi, 1887) .....                                                      | 545      |
| Deposits, Form of. (Muntz and Mareau.) (viii, 1889) .....                                                    | 627      |
| Earth from Turkistan. (Ljubawin.) (iv, 1885) .....                                                           | 344      |
| In Dresden. (T.R.) (vii, 1888) .....                                                                         | 649      |
| Industry. (T.R.) (xii, 1893) .....                                                                           | 476      |
| Loss of, by Gay-Lussac Tower. (Lunge and Naef.) (iii, 1884) .....                                            | 636      |
| Loss of, in Mann of Vitriol. (Eschellmann.) (iii, 1884) .....                                                | 134      |
| Mixtures of Superphosphates with, Loss of Nitrogen in. (Gussfeldt.) (vi, 1887) .....                         | 551      |
| Question in Germany. (T.R.) Polakowsky. (xiii, 1894) .....                                                   | 539      |

| (Le Roy.) (xi, 1892) .....                                                                                   | 106, 918 |
| Acid, Action of, on Dimethylorthoanisidine. (van Romburgh.) (xi, 1892) .....                                 | 155      |
| Acid, Action of, on Lead. (Lunge.) (xii, 1893) .....                                                         | 116      |
| Acid, Action of, on Naphthol Derivatives. (Armstrong and Kossier.) (x, 1891) .....                           | 602      |
| Acid, Action of, on Pine Wood. (Lindsey and Tollens.) (xi, 1892) .....                                       | 835      |
| Acid, Action of, on Plant Fibres. (Cross and Bevan.) (x, 1891) .....                                         | 831      |
| Acid, Action of, on Potassium Bichromate. (Schmidt.) (xii, 1893) .....                                       | 153      |
| Acid, Action of, on Silk. (Vignon and Sidney.) (xi, 1892), 439; (xiii, 1894), 32                             |          |
| Acid, Action of, on Yellow Phosphorus. (Watson.) (xi, 1892) .....                                            | 227      |
| Acid, $\alpha$ - or $\beta$ -Naphthol a Test for. (Hager.) (v, 1886) .....                                   | 457      |
| Acid and HCl, Manufacture of Chlorine from. (P) Johnson. From The Verein Chem. Fab. (xiv, 1895) .....        | 483      |
| Acid and Lead, Chemical Changes between. (Veley.) (x, 1891) .....                                            | 206      |
| Acid and Metals, Chemical Changes between. (Veley.) (x, 1891) .....                                          | 201      |
| Acid and Tin, Products of the Interaction of. (Walker.) (xii, 1893) .....                                    | 449      |
| Acid, Apparatus for Avoiding Loss of in Manufacture of Sulphuric Acid. (P) Benker and Lasse. (i, 1882) ..... | 180      |

## Nitric Acid—cont.

|                                                                                                                 |          |
|-----------------------------------------------------------------------------------------------------------------|----------|
| Acid, Apparatus for Condensation of:                                                                            |          |
| (P) Edwards. From Guttman and Rohrmann. (xi, 1892) .....                                                        | 349      |
| (P) Guttman. (ix, 1890) .....                                                                                   | 862      |
| (P) Newton. From Hart. (xiii, 1894) .....                                                                       | 1197     |
| Acid, Apparatus for Continuous Production of. (Prentice.) (xiii, 1894) .....                                    | 323      |
| Acid, Apparatus for Manufacture of Concentrated. (P) Valentiner. (xii, 1893) .....                              | 155      |
| Acid Apparatus, Modification of Krenser's. (Robson.) (xi, 1892) .....                                           | 504      |
| Acid, Changes of Colour of. (Marchlewski.) (x, 1891) .....                                                      | 1005     |
| Acid Chlorine Processes. (Davis.) (ix, 1890) .....                                                              | 389      |
| Acid, Condensation of:                                                                                          |          |
| (Guttman.) (x, 1891) .....                                                                                      | 638      |
| (Hart.) (xiv, 1895) .....                                                                                       | 967      |
| Acid, Conditions of Reaction between Copper and. (Veley.) (viii, 1889) .....                                    | 858      |
| Acid, Danger of Fire through. (Lechartier.) (v, 1886) .....                                                     | 379      |
| Acid, Decomposition of, by Ammonium Sulphate. (Lunge and Abenius.) (xiv, 1895) .....                            | 35       |
| Acid, Detection of. (Longi.) (iii, 1884), 533; (iv, 1885) .....                                                 | 553      |
| Acid, Detection of, in Alkali Salts. (de Koninck.) (vi, 1887) .....                                             | 384      |
| Acid, Detection of, in Vinegar. (Soltsien.) (xi, 1892) .....                                                    | 372      |
| Acid, Detection of, in Waters and Soils. (Breal.) (vii, 1888) .....                                             | 590      |
| Acid, Determination of. (Wilfarth.) (vii, 1888) .....                                                           | 692      |
| Acid, Determin. of, as Ammonia. (Reichardt.) (v, 1886) .....                                                    | 617      |
| Acid, Determination of, by Ferrous Sulphate. (Bailhache.) (viii, 1889) .....                                    | 820      |
| Acid, Determination of, in Drinking Water by Scholze-Tiemann's Method. (Spiegel.) (ix, 1890) .....              | 896      |
| Acid, Determin. of Nitrogen in. (Stokasa.) (xii, 1893) .....                                                    | 711      |
| Acid, Direct Production of. (P) Murray. From The Chemische Fabrik Griesheim. (x, 1891) .....                    | 1006     |
| Acid, Electrolytic Determin. of. (Vortmann.) (ix, 1890) .....                                                   | 1006     |
| Acid, Estimation of. (Longi.) (iii, 1884), 533; (iv, 1885) .....                                                | 368      |
| Acid, Estimation of, and Reduction of Same to Ammonia. (Boyer.) (ix, 1890) .....                                | 897      |
| Acid, &c., Apparatus for Distilling and Condensing. (P) Maxfield. From Dieterle and Rohrmann. (xiv, 1895) ..... | 272      |
| Acid, Radiometric Determin. of. (Glaser.) (xii, 1893) .....                                                     | 64       |
| Acid Gas, Obtaining Continuous Supply of. (P) Walker. (xiv, 1895) .....                                         | 968      |
| Acid, Guttman's Manufacture of. (Andersch.) (x, 1891) .....                                                     | 45       |
| Acid in Manganese Ores. (i, 1883) .....                                                                         | 159      |
| Acid in Mercuric Oxide, Detect. of. (Mylius.) (ii, 1883) .....                                                  | 427      |
| Acid in Plants, Origin and Alteration of. (Frank.) (vii, 1888) .....                                            | 444      |
| Acid in the Higher Plants. (Kreusler.) (vi, 1887) .....                                                         | 532      |
| Acid in Wines, Detection of. (Borgmann.) (vii, 1888) .....                                                      | 457      |
| Acid, Inflammability of Vegetable Matter by. (Hass.) (iv, 1885) .....                                           | 496      |
| Acid, Influence of Force, on Precipitation of Barium. (Browning.) (xiii, 1894) .....                            | 176      |
| Acid, Influence of Nitrogen Tetroxide on Specific Gravity of. (Lunge and Marchlewski.) (xi, 1892) .....         | 776      |
| Acid, Manufacture of. (iv, 1885) .....                                                                          | 592      |
| (P) Chatfield. (xi, 1892) .....                                                                                 | 907      |
| (P) Garraway. (xii, 1893) .....                                                                                 | 751      |
| (Guttman.) (xii, 1893) .....                                                                                    | 203      |
| (Hallwell.) (xiv, 1895) .....                                                                                   | 656      |
| (P) Prentice. (xiii, 1894) .....                                                                                | 250, 250 |
| (P) Taylor. (vii, 1888) .....                                                                                   | 210      |
| (P) Vogt. (xii, 1893) .....                                                                                     | 43       |
| Acid, Oxidation of Nitrous Acid to. (Carpenter.) (v, 1886) .....                                                | 287      |
| Acid, Oxidation of Rhamnose by. (Will and Peters.) (viii, 1889) .....                                           | 718      |
| Acid, Paratoluidine Sulphate as a Test for. (Longi.) (iii, 1884) .....                                          | 533, 649 |
| Acid, Points in the Distillation of. (Hart.) (xiv, 1895) .....                                                  | 967      |
| Acid, Preparation of Pure. (P) Edwards. From Guttman and Rohrmann. (xi, 1892) .....                             | 1005     |
| Acid, Production of. (P) Lunge and Maxwell-Lyte. (xiii, 1894) .....                                             | 734      |
| Acid, Production of, from Nitrates. (P) Darling and Forrest. (xiii, 1894) .....                                 | 647      |
| Acid, Production of, in United States. (Martyn.) (iv, 1885) .....                                               | 28       |
| Acid, Purifying and Decolorising Crude, and Apparatus therefor. (P) Pratt. (ix, 1886) .....                     | 31       |
| Acid, Quantitative Estimation of. (Wildt and Scheibe.) (iii, 1884) .....                                        | 378      |
| Acid, Reaction of Carbamides with. (Franchimont.) (vi, 1887) .....                                              | 681      |
| Acid, Reducing Action of Coke on. (Lunge.) (iv, 1885) .....                                                     | 31       |
| Acid, Reduction of, by Copper and Lead. (Higley.) (xiv, 1895) .....                                             | 661      |
| Acid, Relative Passivity of Wrought-Iron and Steel Plates in. (Andrews.) (xi, 1892) .....                       | 610      |
| Acid, Schlosing's Method of Estimating. (de Koninck.) (xiii, 1894) .....                                        | 763      |
| Acid, Schulze-Tiemann's Method for Determining, in Water. (Hmidt.) (ix, 1890) .....                             | 972      |
| Acid, Table for Estimation of. (Baumann.) (viii, 1889) .....                                                    | 135      |
| Acid, Test for. (Hager.) (iii, 1884) .....                                                                      | 533      |
| Acid, Testing for Presence of Iron. (Lunge.) (i, 1882) .....                                                    | 16       |

| Estimation of, by Schlotheim-Thomann's (Schlotheim's) Method. (Cochius and Moeller.) (ix, 1890)..... | 417                  | Loss of, in Manufacturing Bone-Fat. (Bornträger.) (vi, 1887).....                                          | 825  |
| Extraction of, from Air. (P) Chapman. (xii, 1893).....                                               | 708                  | Loss of, in Mixtures of Superphosphates with Nitre. (Gussefeldt.) (vi, 1887).....                          | 551  |
| Fixation of, (Pawst.) (ix, 1890).....                                                                | 30, 271              | Loss of, in the Decay of Organic Substances. (Krause.) (ix, 1890).....                                     | 955  |
| Fixation of Atmospheric:                                                                             |                      | Manurial Value of Certain Forms of, (Klein.) (vii, 1888).....                                              | 332  |
| (Berthelot.) (vi, 1887), 552; (ix, 1890).....                                                        | 86                   | Manuring Oats and Barley with, (Mareker.) (iv, 1885).....                                                  | 126  |
| (Breneman.) (ix, 1890).....                                                                          | 864                  | Nitre and Total, Determining. (Boyer.) (xi, 1892).....                                                     | 182  |
| (P) Rogation. (xii, 1893).....                                                                       | 626                  | Nitric, Determination of, by Kjeldahl's Method. (Poerster.) (viii, 1889).....                              | 220  |
| Fixation of, by Arable Soil. (Berthelot.) (v, 1886).....                                             | 103                  | Obtaining. (P) Maltzan and Traills. (vii, 1888).....                                                       | 844  |
| Fixation of, by Argillaceous Soils. (Berthelot.) (v, 1886).....                                      | 498                  | Obtainment of, from Atmospheric Air. (P) Brin. (v, 1886).....                                              | 40   |
| Fixation of, by Electricity. (T.R.K.) (x, 1891).....                                                 | 758; (ix, 1890)..... | Of Air and Hydrogen of Water, Preparation of Ammonia from. (P) Gesellschaft L'Azote. (i, 1882).....        | 150  |
| Fixation of, by Leguminous Plants. (Breal.) (vii, 1888).....                                         | 205                  | Of Coal, Behaviour of, during Destructive Distillation. (Smith.) (iii, 1884).....                          | 234  |
| Fixation of, Experiments on. (Lawes and Gilbert.) (ix, 1890).....                                    | 633                  | Of Coal, &c., Obtaining Ammonium Chloride from. (French.) (vii, 1888).....                                 | 735  |
| For Manuring Sugar-Beets. (Durrant.) (i, 1882).....                                                  | 328, 328             | Of Leguminous Crops, Sources of. (Lawes and Gilbert.) (xi, 1892).....                                      | 253  |
| Formation of Nitrous Acid and Ammonia from Free. (Loew.) (ix, 1890).....                             | 979                  | Of Minerals, Production of Ammonia from. (Beilby.) (iii, 1884).....                                        | 216  |
| -Free Extract of Barley. (Lüntzer.) (ix, 1890).....                                                  | 1653                 | Of Moors, Production of Ammonium Sulphate from. (P) Wise. From Groven. (x, 1891).....                      | 45   |
| Gain of, in Soils Destitute of Vegetation. (Thecke.) (viii, 1889).....                               | 907                  | Of Oilworks Sludge, Conversion of, into Ammonia. (Redwood.) (x, 1891).....                                 | 108  |
| Gain or Loss of, by Cultivated and Fallow Soils, Experiments on. (Pagnoul.) (ix, 1890).....          | 875                  | Of Petroleum and Paraffin Oils. (Beilby.) (x, 1891).....                                                   | 120  |
| Gas, Apparatus for Producing, &c. (P) Oyer. (x, 1891).....                                           | 528                  | Of Vegetation, Sources of. (Lawes and Gilbert.) (vii, 1889).....                                           | 405  |
| Gas, Prep. of Cyanides by Aid of, (P) Alder. (i, 1882).....                                          | 408                  | Organic, Estimation of, by Kjeldahl's Method. (Aubin and Alla.) (viii, 1889).....                          | 574  |
| Green Manures as Suppliers of, (Muntz.) (ix, 1890).....                                              | 875                  | Organic, Estimation of, by Soda Lime and by Kjeldahl's Method. (Hote.) (vii, 1889).....                    | 574  |
| Gunning's Modification of Kjeldahl's Method of Estimating. (Atterberg.) (ix, 1890).....              | 825                  | Organic, in Water, Estimation of. (Leffmann and Beam.) (viii, 1889).....                                   | 480  |
| (Carrigues.) (xiv, 1895).....                                                                        | 304                  | Organic, Methods of Estimating. (Oddy and Cohen.) (ix, 1890).....                                          | 17   |
| In Ammonium Salts, Estimation of, by the Azotometer. (Hentschel.) (ix, 1890).....                    | 971                  | Oxide, Determination of Oxygen by, (de Koninck.) (x, 1891).....                                            | 485  |
| In Arable Soils, Loss and Gain of, (Deherain.) (ii, 1883).....                                       | 185                  | Oxides of, (Ramsay and Cundall.) (iv, 1885).....                                                           | 208  |
| In Bone Dust, Value of, (iii, 1884).....                                                             | 185                  | Pentoxide. (Meyer.) (viii, 1889).....                                                                      | 283  |
| In Chili Saltpetre and Ammonium Sulphate, Value of. (Baessler.) (viii, 1889).....                    | 205                  | Peroxide, Behaviour of, to Sulphuric Acid. (Lange.) (i, 1882).....                                         | 107  |
| In Coal and Coke, Determination of. (Schmütz.) (v, 1886).....                                        | 506                  | Peroxide, Dissociation of. (Natanon.) (iv, 1885).....                                                      | 403  |
| In Coal-Gas. (Davis.) (vi, 1892).....                                                                | 496                  | Preparation of Pure. (Le Due.) (xi, 1892).....                                                             | 269  |
| In Coal-Gas, Estimation of, (Now.) (vi, 1892).....                                                   | 415                  | Production of, from Air. (P) Chapman. (xii, 1893).....                                                     | 863  |
| In Fertilisers, Determination of. (Sherman.) (xiv, 1895).....                                        | 989                  | Relation of, to Arable Soil. (Schlotheim and others.) (vii, 1888).....                                     | 757  |
| In Fuels, and Yield of Ammonia therefrom. (Tichauer.) (xiv, 1895).....                               | 143                  | Ruffe's Method for Determination of, (Fassbender.) (i, 1882).....                                          | 384  |
| In Guano, Estimation of. (König.) (i, 1882).....                                                     | 401                  | Secondary Products containing. (Hosva.) (xiii, 1894).....                                                  | 792  |
| In Leather Waste. (Dangay.) (iv, 1885).....                                                          | 538                  | Separation of Carbonic Oxide from. (P) Garduer, From Henderson. (vii, 1888).....                           | 315  |
| In Manures, Determination of:                                                                        |                      | Separation of Sulphuretted Hydrogen from. (P) Parnell and Simpson. (v, 1886).....                          | 33   |
| (Aubin and Quenot.) (ix, 1890).....                                                                  | 773                  | Soda-Lime Method for Determining. (Atwater and Woods.) (vi, 1887).....                                     | 840  |
| (Stutzel and Reimer.) (vi, 1887).....                                                                | 157                  | Sources of Loss in Estimation of. (Atwater and Ball.) (vii, 1888).....                                     | 528  |
| In Manures, Estimation of, (v, 1886).....                                                            | 540                  | Substitution in Groups linked to. (Matignon.) (xi, 1892).....                                              | 937  |
| (Wagner.) (iv, 1885).....                                                                            | 124                  | Supplied as a Nitrate to Plants. (Wolff and Kreuzhage.) (vii, 1888).....                                   | 921  |
| In Meat Extracts, Determination of. (Stutzel.) (xiv, 1895).....                                      | 897                  | Tetroxide, Formation of. (Lange and Naef.) (iii, 1884).....                                                | 635  |
| In Nitrates and Mixtures, Determination of. (Schenke.) (xii, 1893).....                              | 1063                 | Tetroxide, Influence of, on Specific Gravity of Nitric Acid. (Lange and Marchlewski.) (xi, 1892).....      | 775  |
| In Nitrates and Nitric Acid, Determination of. (Stoklasa.) (xii, 1893).....                          | 711                  | Tetroxide, Manufacture and Application of. (i, 1882).....                                                  | 159  |
| In Nitrates, Determination of. (Sullwold.) (x, 1891).....                                            | 164, 164             | Transformation of, into Ammonia. (Scheurer-Kesner.) (ii, 1883).....                                        | 407  |
| In Nitrates, Estimation of:                                                                          |                      | Treatment of Products of Combustion of Fuels containing. (P) Derby. (iii, 1884).....                       | 163  |
| (Arnold and Wesenmeyer.) (xii, 1893).....                                                            | 183                  | Trioxide, Action of, on Organic Compounds. (Friedburg and Mandel.) (ix, 1890).....                         | 1072 |
| (Devard.) (xii, 1893).....                                                                           | 550                  | Trioxide, Solubilization of. (Bilans.) (viii, 1889).....                                                   | 726  |
| (Jodlbauer.) (v, 1886).....                                                                          | 510                  | Uses and Sources of, in Agriculture. (Aukman.) (ix, 1890).....                                             | 631  |

| (P) Von Dahnien. (ix, 1890).....                                                                         | 105  | Separating Isomers in Crude. (P) Lange. (x, 1891).....                                                                                     | 139      |
| Nobel's Preparations of. (Tetmajer.) (i, 1882).....                                                      | 338  | Nitrotoluene Acid. (Noelting.) (xi, 1892).....                                                                                             | 344      |
| Points in the Manufacture of. (Blumen.) (xiv, 1895).....                                                 | 507  | Nitrotoluidine derived from Liquid Dinitro toluene: (Berthelot.) (ii, 1883).....                                                           | 169      |
| Preparations, Analysis of. (Hess.) (i, 1882).....                                                        | 382  | (Ullmann.) (iv, 1885).....                                                                                                                 | 114      |
| Recovery of Waste Acids in Manufacture of. (P) Poltsch. (iv, 1885).....                                  | 243  | Nitrotoluidine, Manufacture of. (P) Mellor. (ii, 1883).....                                                                                | 474      |
| Regulations in Preparation of. (Scheidt.) (x, 1891).....                                                 | 66   | Nitrous Acid, Action of, in the Grove Battery. (Thle.) (xiv, 1895).....                                                                    | 872      |
| Vessels, Spontaneous Combustion of Sponges Used in Cleaner. (iv, 1885).....                              | 366  | Acid, Action of, on 1- $\alpha$ -amido-2- $\beta$ -naphthol. (Meldola.) (xii, 1893).....                                                   | 141      |
| See also under Explosives.                                                                               |      | Acid, Action of, on Silk. (Vignon and Lisle.) (xii, 1894).....                                                                             | 32       |
| Nitro-hydrocarbons, Reduction of. (Kock.) (vi, 1887).....                                                | 633  | Acid, Action of, on Tetramethyl-diamidobenzophenone: (Bischoff.) (vii, 1888).....                                                          | 742      |
| Nitro-jute. An Explosive. (Müllhauser.) (xi, 1892).....                                                  | 546  | (Herzberg and Polonowsky.) (xi, 1892).....                                                                                                 | 156      |
| Nitrosoketoline. (Feer and Koenigs.) (iv, 1885).....                                                     | 752  | Acid, Action of Sulphurous Acid on. (Raschig.) (vii, 1887).....                                                                            | 159      |
| Nitro-keto-compounds, Formation of. (Armstrong and Rossiter.) (x, 1891).....                             | 693  | Acid, $\alpha$ - or $\beta$ -Naphthol, a Test for. (Hager.) (iv, 1886).....                                                                | 457      |
| Nitro-ketone derived from Camphosphulphophenols. (Cazeneuve.) (xi, 1892).....                            | 512  | And Ammonia, Formation of, from Free Nitrogen. (Loew.) (ix, 1890).....                                                                     | 979      |
| Nitrometer, Alleged Error in Using the. (Lunge.) (v, 1886).....                                          | 82   | And Anhydride, Existence of, in Gaseous State. (Lunge.) (1885).....                                                                        | 563      |
| Analysis of Saltpetre by means of the. (Lunge.) (i, 1882).....                                           | 15   | Acid, Colour Tests with. (Nickel.) (xiii, 1889).....                                                                                       | 821      |
| Applications of the: (Allen.) (iv, 1885).....                                                            | 178  | Acid, Conditions of Formation and Decomposition of. (Velej.) (xii, 1893).....                                                              | 833      |
| (Lunge.) (iv, 1885).....                                                                                 | 495  | Acid, Detection of: (Curmann.) (ix, 1890).....                                                                                             | 706      |
| Construction of the. (Heutell.) (vii, 1888).....                                                         | 232  | (Lunge.) (xi, 1891).....                                                                                                                   | 216      |
| For Estimating Nitrates. (Henry.) (xiii, 1894).....                                                      | 764  | Acid, Detection of, in Alkal. Salts. (de Koninck.) (vi, 1887).....                                                                         | 844      |
| Powder. (Horn.) (xii, 1893).....                                                                         | 185  | Acid, Detection of, in Drinking Water. (Priskauer.) (xiii, 1889).....                                                                      | 569      |
| Nitrometoxylbenzaldehydes, Isomeric. (Tiemann and Ludwig.) (ii, 1885).....                               | 268  | Acid, Estimation of. (Kalmann.) (vii, 1884).....                                                                                           | 870      |
| Nitronaphthalene, Detection of, in Mineral Oils. (Leonard.) (xiii, 1894).....                            | 80   | Acid, New Reagent for. (Jensen.) (ii, 1884).....                                                                                           | 203      |
| Preparation of $\beta$ -. (Lellmann.) (vi, 1887).....                                                    | 541  | Acid, Oxidation of, to Nitric Acid. (Garpentier.) (v, 1886).....                                                                           | 287      |
| -Sulphonic Acid, 1:4. (Cleve.) (ix, 1890).....                                                           | 604  | Acid, Tension of. (Lunge.) (xi, 1891).....                                                                                                 | 764      |
| Nitronaphthalic Acid. (Quincke.) (vii, 1888).....                                                        | 382  | Acid, Test for. (Hager.) (iii, 1884).....                                                                                                  | 533      |
| Nitro- $p$ -Naphthoquinone. (Quincke.) (vii, 1888).....                                                  | 382  | Acid, Tests for. (Jensen.) (ii, 1884).....                                                                                                 | 340      |
| Nitro-Organisms, Purif. Water from. (P) Oberz. (v, 1886).....                                            | 39   | Acid Vapours, Preparation of, from Air. (P) Prim. (ii, 1883).....                                                                          | 289      |
| Nitro-ortho-toluidine and its Derivatives. (Noelting and Collin.) (iv, 1885).....                        | 389  | Acid, Volumetric Estimation of. (Green and Evershed.) (v, 1886).....                                                                       | 623      |
| Nitro- $p$ -amidophenol, <i>m.</i> and its Derivatives. (Hahle.) (x, 1891).....                          | 691  | And Nitric Acid, Estimation of. (Lunge.) (iii, 1889).....                                                                                  | 533      |
| Nitro- $p$ -diazophenol Chloride, <i>m.</i> (Hahle.) (x, 1891).....                                      | 692  | Anhydride, <i>See also</i> Nitrogen Trioxide. Compounds, Recovery of. (P) Societe Anonyme des Produits Chimiques de Javel. (ix, 1886)..... | 456, 460 |
| Nitro- $p$ -iodophenol, <i>m.</i> (Hahle.) (x, 1891).....                                                | 692  | Oxide, Boiling Point of. (Ramsay and Shields.) (xii, 1893).....                                                                            | 384      |
| Nitro- $p$ -iodophenol, <i>m.</i> (Hahle.) (x, 1891).....                                                | 692  | Oxide, Decomposition of. (Wagner.) (i, 1882).....                                                                                          | 501      |
| Nitro- $p$ -iodophenol, <i>m.</i> (Hahle.) (x, 1891).....                                                | 692  | Oxide, Formation of. (Smith.) (xi, 1892).....                                                                                              | 1087     |
| Nitro- $p$ -toluidine, Action of Quinones on. (Leicester.) (ix, 1890).....                               | 1029 | Oxide, Manufacture of. (Thilo.) (xii, 1894).....                                                                                           | 170      |
| Nitropenta-erythrite, Prod. of. (P) Thieme. (xiv, 1895).....                                             | 64   | Oxide, Melting Point of Solid. (Ramsay and Shields.) (xii, 1893).....                                                                      | 384      |
| Nitrophenols, Preparation of <i>o</i> - and <i>p</i> -Nitraniline from. (Merz and Kitz.) (v, 1886).....  | 450  | Oxide, Physical Properties of Pure. (Villard.) (xiii, 1894).....                                                                           | 1087     |
| Nitroprheidine. (Töhl.) (vii, 1888).....                                                                 | 381  | Oxide, Production of. (P) Smith and Elmore. (xi, 1892).....                                                                                | 633      |
| Nitropseudocumene, Preparation of. (Edler.) (iv, 1885).....                                              | 388  | Oxide, Reduction of, by Metals. (Sabatier and Senderens.) (xiv, 1895).....                                                                 | 833      |

|------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| Action of Metals on. (Livache.) (ii, 1883) .....                                                                       | 349                               |
| Action of, on Metals. (Redwood.) (v, 1886) .....                                                                       | 362                               |
| Action of, on Polarised Light. (Bishop.) (vi, 1887) .....                                                              | 750                               |
| Action of Sulphur Chloride on. (Fawcitt.) (vii, 1888) ..                                                               | 552                               |
| Adulteration of, in Portugal, Laws affecting. (T.R.) (xiv, 1895) .....                                                 | 81                                |
| Aerated, Compounds of, with Pyroxylin. (P) Fairfax, From Field. (xiii, 1891) .....                                     | 164                               |
| Analysis and Constitution of. (Benedikt and Ullzar.) (vii, 1888) .....                                                 | 594                               |
| Analysis of. (Archbutt.) (v, 1886) .....                                                                               | 303                               |
| And Essences, Report on Volatile. (ix, 1890) .....                                                                     | 965                               |
| And Fats, African. (T.R.) (xi, 1892) .....                                                                             | 377                               |
| And Fats, Apparatus for Purification of. (P) Lake, From de Nuge. (iv, 1885) .....                                      | 679                               |
| And Fats, Purification of, and Products from. (P) Mitchell, Hagenmann, and von Schmidt. (viii, 1889) .....             | 624                               |
| And Fats, Quantitative Estimation of:                                                                                  |                                   |
| (Mills and Akitt.) (iii, 1884) .....                                                                                   | 366                               |
| (Mills and Snodgrass.) (ii, 1883) .....                                                                                | 435                               |
| And Fats, Refining and Deodorising. (P) Wilson. (iii, 1884) .....                                                      | 450                               |
| And Fats, Separ. of, from Water. (P) Dehne. (xiv, 1895) .....                                                          | 1058                              |
| And Fats, Specific Gravity of some. (Crampton.) (viii, 1889) .....                                                     | 551                               |
| And Oil Seeds in Marseilles. (T.R.) (ix, 1890) .....                                                                   | 775                               |
| And Resins, Resistance of, to Moisture. (Laurie.) (ix, 1890) .....                                                     | 583                               |
| Aniline, Analysis of:                                                                                                  |                                   |
| (Reinhardt.) (xii, 1893) .....                                                                                         | 951                               |
| (Schoop.) (v, 1886) .....                                                                                              | 178                               |
| Animal and Mineral, Influence of, on Machinery. (i, 1882) ..                                                           | 326                               |
| Animal, Vegetable, and Mineral, Solidifying. (P) Chemball. (xii, 1893) .....                                           | 277                               |
| Apparatus for Burning:                                                                                                 |                                   |
| (P) Lindley and Browett. (x, 1891) .....                                                                               | 242                               |
| (P) Rose. .....                                                                                                        | (ix, 1890), 1025; (xi, 1892), 423 |
| Apparatus for Burning Light and Heavy Portions of. (P) Thompson, From Harvey and others. (xi, 1892) .....              | 996                               |
| Apparatus for Decomposing. (P) Heekel. (i, 1882) .....                                                                 | 193                               |
| Apparatus for Deodorising. (P) Filbert. (xiv, 1895) .....                                                              | 587                               |
| Apparatus for Determining Liability of, to Spontaneous Combustion. (Richards.) (xi, 1892) .....                        | 547                               |
| Apparatus for Distill. of, into Gas. (Mendham.) (vi, 1887) ..                                                          | 199                               |
| Apparatus for Distill. of Mineral. (P) Laing. (x, 1891), 630, 631; (xi, 1892), 341; (xii, 1893), 1020                  |                                   |
| Apparatus for Extraction of:                                                                                           |                                   |
| (P) Boulton, From Boulet and others. (x, 1891) .....                                                                   | 683                               |
| (P) Boulton, From Oppelt. (vi, 1887) .....                                                                             | 378                               |
| (P) MacIlwaine. (vii, 1888) .....                                                                                      | 126                               |
| Apparatus for Filtering:                                                                                               |                                   |
| (P) Pelat. (xii, 1893) .....                                                                                           | 133                               |
| (P) Tong and Wood. (xiv, 1895) .....                                                                                   | 587                               |
| Apparatus for Manufacture of Gas from:                                                                                 |                                   |
| (P) Boulton, From Hanlon. (iv, 1885) .....                                                                             | 530                               |
| (P) Moeller. (xii, 1893) .....                                                                                         | 255                               |
| Apparatus for Obtaining Constant Water Pressure in Estim. of Freezing Point of. (Gantter.) (xiii, 1894) ..             | 1090                              |
| Apparatus for Purifying:                                                                                               |                                   |
| (P) Lake, From La Société des Parfums Naturels de Cannes. (xi, 1891) .....                                             | 159                               |
| (P) Turney. (xiii, 1894) .....                                                                                         | 46                                |
| Apparatus for Saponification of. (P) Heekel. (ii, 1883) ..                                                             | 287                               |
| Apparatus for Solidifying Paraffin in. (P) Mackay and Baxter. (iv, 1885) .....                                         | 679                               |
| App. for Treating. (P) Wirth, From Starck. (iv, 1885) ..                                                               | 200                               |
| Apparatus for Treating Substances containing. (P) Robbins. (xiii, 1894) .....                                          | 1070                              |
| Apparatus for Vaporising. (P) Spencer. (xi, 1892) .....                                                                | 174                               |
| Apricot, Cherry, Plum, and Peach, as Adulterants of Almond Oil. (Micko.) (xii, 1893) .....                             | 935                               |
| Aromatic, Antiseptics derived from. (Trillat.) (xi, 1892) ..                                                           | 1027                              |
| Bleaching. (P) Lake. (v, 1886) .....                                                                                   | 609                               |

| Essential, and Anise in Bulgarian. (T.R.) (vii, 1888).....                                          | 462      |
| Essential, and Distilled Perfumes. (Mason.) (viii, 1889).....                                       | 722      |
| Essential, Distillation of. (Child.) (xii, 1893).....                                               | 511      |
| Essential, of the Distillery, Estimate of Alcohol in. (Fabre and others.) (ix, 1895).....           | 376      |
| Essential, Examination of. (Hager.) (iv, 1885).....                                                 | 611      |
| Essential, Extracting from Hops. (P) Lake. From Breithaupt. (iii, 1884).....                        | 376      |
| Essential, in Réunion. (T.R.) (vi, 1887).....                                                       | 611      |
| Essential, in Straits Settlements. (T.R.) (vii, 1888).....                                          | 215      |
| Essential, in their relation to British Pharmacopœia and Trade. (Umney.) (xiv, 1895).....           | 591      |
| Essential, of Lemons, Limes, &c. (Barrett.) (x, 1891).....                                          | 106      |
| Essential, Oxidation of. (Kingzett.) (vii, 1888).....                                               | 67       |
| Essential, Properties of. (Lettenmayer.) (xii, 1891).....                                           | 273      |
| Essential, Reaction of. (Stern.) (xii, 1893).....                                                   | 628      |
| Essential, Sp. Gr. of. (Schimmel and Co.) (vi, 1887).....                                           | 418      |
| Ethereal:                                                                                           |          |
| (Beilstein and Weigand.) (ii, 1883).....                                                            | 138      |
| (Wallach.) (x, 1891).....                                                                           | 789      |
| Ethereal, Adulteration of, with Fatty. (ii, 1883).....                                              | 182      |
| Ethereal, Analysis of:                                                                              |          |
| (Benedikt and Grüssner.) (viii, 1889).....                                                          | 925      |
| (Benedikt and Strache.) (xii, 1893).....                                                            | 1066     |
| Ethereal, and Terpenes:                                                                             |          |
| (Wallach)..... (vii, 1888), 587; (viii, 1889), 635; (ix, 1890), 1147; (xii, 1893), 861              |          |
| (Wallach and Gildemeister.) (vii, 1888).....                                                        | 586      |
| Ethereal, Antiseptic Action of. (Riedlin.) (vii, 1888).....                                         | 226      |
| Ethereal, Colour Reactions of. (Ihl.) (viii, 1889).....                                             | 421      |
| Ethereal, Constant for Analysis of. (Crismer.) (xiv, 1895).....                                     | 1069     |
| Ethereal, Estimation of. (Levanlois.) (iv, 1885).....                                               | 294      |
| Ethereal, Examination of. (Schimmel and Co.) (xiii, 1893).....                                      | 66       |
| Ethereal, Indo-European Trade in. (T.R.) (xiv, 1895).....                                           | 1079     |
| Ethereal, Lepidine a Reagent for. (Ihl.) (x, 1891).....                                             | 165      |
| Ethereal, Manufacture of Medicinal Compounds from. (P) Johnson. From von Heyden. (x, 1891).....     | 1027     |
| Ethereal, Occurrence of Camphene in. (Bertram and Walbaum.) (xiii, 1894).....                       | 750      |
| Ethereal, of Allium Ursinum. (Semmler.) (vi, 1887).....                                             | 676      |

## Oils—cont.

## PAGE

|                                                                                                                           |          |
|---------------------------------------------------------------------------------------------------------------------------|----------|
| Ethereal, Olefinic Constituents of. (Semmler.) (x, 1891).....                                                             | 382      |
| Ethereal, Oxygen Compounds from. (Semmler and Tiemann.) (xi, 1892).....                                                   | 706      |
| Ethereal, Pyrral a Reagent for. (Ihl.) (ix, 1890).....                                                                    | 770      |
| Ethereal, Solubility of Iodine in. (Hirschsohn.) (vi, 1887).....                                                          | 834      |
| Ethereal, Technical Analysis of. (Klimont.) (xii, 1894).....                                                              | 985      |
| Ethereal, their Adulterants and Detection of. (Schimmel and Co.) (xiv, 1895).....                                         | 605      |
| Examination of. (Jean.) (ix, 1890).....                                                                                   | 113      |
| Explosive, Solidifying. (P) Grunbaum. (viii, 1890).....                                                                   | 112      |
| Extracting, from Waste Products. (P) Hall. (v, 1886).....                                                                 | 432      |
| Extraction of, by Sulphurous Acid. (P) Grills and Schröder. (ix, 1890).....                                               | 300      |
| Extraction of, from Bituminous Rocks in Italy. (Murrice.) (iv, 1885).....                                                 | 182      |
| Extraction of, from Kernels and Seeds. (Majumdar.) (xiv, 1895).....                                                       | 1049     |
| Extract of, from Wool. (P) Singer and Judell. (vii, 1888).....                                                            | 499      |
| Fat, Detection of Mineral Oil and Resin Oil in. (Focke.) (v, 1886).....                                                   | 176      |
| Fat, Examination of Castor Oil for other. (Pinkener.) (vi, 1887).....                                                     | 148      |
| Fats, &c., Hardening. (P) Clark. From Wirth. (v, 1886).....                                                               | 103      |
| Fatty Acids and Glycerin from. (P) Lewkowitsch. (viii, 1889).....                                                         | 290      |
| Fatty Acids of Drying. (Hazura.) (viii, 1889).....                                                                        | 806      |
| Fatty, Action of on Metals. (Donath.) (xiv, 1895).....                                                                    | 283      |
| Fatty, Adulteration of. (Richter.) (ii, 1883).....                                                                        | 384, 481 |
| Fatty and Mineral, Detection of Rosin Oil in:                                                                             |          |
| (Grittnier.) (x, 1891).....                                                                                               | 728      |
| (Holde.) (ix, 1890).....                                                                                                  | 419      |
| Fatty, Detection and Estimation of Metals in. (Fresenius and Schattentroh.) (xiv, 1895).....                              | 895      |
| Fatty, Detection of Mineral Oil in. (Holde.) (viii, 1889).....                                                            | 735      |
| Fatty, Determin. of Mineral Oil in. (Grittnier.) (ix, 1890).....                                                          | 772      |
| Fatty, Effect on, of Exposure to Air. (Kissling.) (x, 1891).....                                                          | 778      |
| Fatty, Elaidin Test for. (Wellmann.) (x, 1891).....                                                                       | 800      |
| Fatty, Examination of, for Mineral Oils. (ii, 1883).....                                                                  | 385      |
| Fatty, Examination of Vaseline for. (Crauzel.) (xiv, 1895).....                                                           | 316      |
| Fatty, Increased Temperature of Fibres containing. (Kissling.) (xiv, 1895).....                                           | 479      |
| Fatty, Indo-European Trade in. (T.R.) (xiv, 1895).....                                                                    | 1079     |
| Fatty, Influence of, on Bactericidal Action of Phenol. (Lemst.) (xiii, 1894).....                                         | 903      |
| Fatty, Localisation of, during Germination of Seeds. (Mesnard.) (xii, 1893).....                                          | 363      |
| Fatty, Oxidation of. (Fahriun.) (xiii, 1894).....                                                                         | 104, 405 |
| Fatty, Solidification of Liquid. (Carpenter.) (iii, 1884).....                                                            | 200      |
| Fatty, Testing Lard for. (Wellmann.) (xi, 1892).....                                                                      | 548      |
| Filtering, Method and Apparatus for. (P) Turner. (vii, 1888).....                                                         | 442      |
| Filters used in Manufacture of. (P) Isch. (xiii, 1894).....                                                               | 377      |
| Fish. (Hegerstahl.) (viii, 1889).....                                                                                     | 51       |
| Fish, Chemistry of. (Fahriun.) (xii, 1893).....                                                                           | 938      |
| Fish, Qualitative Reaction of. (Holde.) (xi, 1892).....                                                                   | 272      |
| Fixed, Chemistry and Analytical Examination of. (Allen.) (ii, 1883), 49; (v, 1886), 65, 282                               |          |
| Fixed, Examination of. (Carpenter.) (ii, 1883).....                                                                       | 101      |
| Fixed, Report on. (ix, 1890).....                                                                                         | 1045     |
| For Heating Purposes, Apparatus for using. (P) Henwood. (xi, 1892).....                                                   | 735      |
| For Lamps. (P) Comp. pour Procédés Seigle. (xiv, 1895).....                                                               | 20       |
| For Treating Wool, Prep. of. (P) Johnson. (vi, 1887).....                                                                 | 141      |
| For Varnishes, Treatment of. (P) St. George. (x, 1891).....                                                               | 810      |
| Free Acid in, Determination of. (Holde.) (ix, 1890).....                                                                  | 1070     |
| Free Acids in, Estimation of. (Richter.) (ii, 1883).....                                                                  | 480      |
| Free Acids in, Methods of Determining. (Holde.) (ix, 1890).....                                                           | 112      |
| Free Fatty Acids in. (Noerdlinger.) (viii, 1889).....                                                                     | 806      |
| Free from Odour or Flavour, Manufacture of. (P) Auel. From Fab. de Prod. Chim. de Thann et de Mulhouse. (xiii, 1894)..... | 406      |
| From Blast Furnaces and Gas Producers, Treatment of. (P) Bell. (iv, 1885).....                                            | 531      |
| From Coke-Ovens, Distillation of. (P) Ellison and Davis. (vi, 1887).....                                                  | 720      |
| From Coke-Ovens, Treatment of. (P) Bell. (iv, 1885).....                                                                  | 537      |
| Furpae, Treating, for making Gas. (P) Stavelev. (x, 1891).....                                                            | 630      |
| Gas, Terpenes from. (Etard and Lambert.) (x, 1891).....                                                                   | 688      |
| Generating and Utilising Gas from. (P) Knieling. (xii, 1893).....                                                         | 1020     |
| Grass, Ind. and. (Dolgel.)..... (ix, 1890), 324; (x, 1891), 158                                                           |          |
| Hardening. (P) Clark. From Wirth. (v, 1886).....                                                                          | 103      |
| Heavy, Duties on, in France. (T.R.) (vii, 1888).....                                                                      | 46, 406  |
| Heavy, Legal Tare on, in France. (T.R.) (vii, 1888).....                                                                  | 779      |
| Hull's Iodine Method for:                                                                                                 |          |
| (Dietrich.) (vii, 1888), 135; (xii, 1893), 381                                                                            |          |
| (Fahriun.) (xii, 1893).....                                                                                               | 381      |
| Hydrocarbon, Apparatus for Burning:                                                                                       |          |
| (P) Bensley. (xiv, 1895).....                                                                                             | 473      |
| (P) Cadwell. (xiv, 1895).....                                                                                             | 140      |
| Hydrocarbon, Appliances for Burning Heavy. (P) Blumman and Sias. (ix, 1890).....                                          | 274      |
| Hydrocarbon, Burners for. (P) Lehmann. (viii, 1894).....                                                                  | 793      |
| Hydrocarbon, Distilling and Gasifying. (P) Caldwell and Tatham. (xiii, 1894).....                                         | 936      |
| Hydrocarbon, Gas from. (P) Lake. From Wilder. (xi, 1892).....                                                             | 424      |
| Hydrocarbon, Generating and Utilising Gas from. (P) Knieling. (xii, 1893).....                                            | 1020     |

|-----------------------------------------------------------------------------------------------------------------------------------|----------|
| Hydrocarbon, Purification of. (P) Boul. From Kennedy. (vi, 1887).....                                                             | 503      |
| Hydrocarbon, Refining. (P) Pitt. (vii, 1888).....                                                                                 | 126      |
| Hydrocarbon, Storing and Burning. (P) Roman. (xiv, 1895).....                                                                     | 955      |
| Hydrocarbons from, Preparation of. (Roll.) (vi, 1887).....                                                                        | 503      |
| Illuminating and Lubricating. (P) Currie. (vii, 1888).....                                                                        | 682      |
| Improving Viscosity of. (P) Marriott. (v, 1886).....                                                                              | 608      |
| In Mexico. (T.R.) (xii, 1893).....                                                                                                | 77       |
| Indices of Refraction of. (Holde.) (x, 1891).....                                                                                 | 166      |
| Industry of, Notes on. Saponification under Pressure. (xii, 1893).....                                                            | 163      |
| Inflammable, Steam-spray Apparatus for. (v, 1886).....                                                                            | 471      |
| Iodine-Absorption Method of Testing. (Gantter.) (xii, 1893).....                                                                  | 717      |
| Iodine Absorption of, Estimating. (Gantter.) (xii, 1893).....                                                                     | 717      |
| Iodine Number of Fats and. (Schweitzer and Lungwitz.) (xiv, 1895).....                                                            | 1030     |
| Kerosene, Safety of Commercial. (Newbury and Cutler.) (vii, 1888).....                                                            | 710      |
| Lamp, Hoff's Multiplier for Distilling. (iii, 1884).....                                                                          | 101      |
| Lavender and Bergamot. (Bertram and Walbaum.) (xi, 1892).....                                                                     | 838      |
| Linseed and other Drying. Treatment of. (P) Ford. (iii, 1884).....                                                                | 181      |
| Lubricating. (Charlier.) (ix, 1890).....                                                                                          | 1043     |
| Lubricating, Analysis of. (Stillman.) (xii, 1894).....                                                                            | 286      |
| Lubricating and Tempering. Treating. (P) Graf. (xi, 1892).....                                                                    | 146      |
| Lubricating, Apparatus for Cooling. (P) Crawshaw. (viii, 1889).....                                                               | 714      |
| Lubricating, Apparatus for Treating Waste. (P) Stott. (vi, 1887).....                                                             | 665      |
| Lubricating, Behaviour of, at Low Temperatures. (Hoffmeister.) (viii, 1889).....                                                  | 423      |
| Lubricating, Changes in, on Keeping. (Holde.) (xi, 1892).....                                                                     | 619      |
| Lubricating, Conditions of Tender for, to Prussian State Railways. (Albrecht.) (xii, 1893).....                                   | 163      |
| Lubricating, Experiments with. (Lamansky.) (ii, 1883, 417; (iv, 1885), 406                                                        |          |
| Lubricating, Flashing Point of: (Holde.)..... (viii, 1889), 734; (ix, 1890), 329 (Martens)..... (ix, 1890), 902; (xii, 1893), 356 |          |
| Lubricating, for Woods, Preparation of. (P) Rumble and Sear. (iv, 1885).....                                                      | 679      |
| Lubricating, Manufacture of: (Ljutyk.) (iv, 1885).....                                                                            | 111      |
| (P) Seger. (iv, 1885).....                                                                                                        | 407      |
| Lubricating, Measurement of Frictions of. (Woodbury.) (iv, 1885).....                                                             | 503      |
| Lubricating, Mineral, Estimation of Ash in. (Stepanow.) (xii, 1893).....                                                          | 552      |
| Lubricating, Purity of Fatty. (Holde.) (xiv, 1895).....                                                                           | 586      |
| Lubricating, Refining. (Roll.) (v, 1886).....                                                                                     | 494      |
| Lubricating, Refining of, and Apparatus therefor. (Scheetop.) (x, 1891).....                                                      | 454      |
| Lubricating, Solidifying Point of, Determination of. (Martens) (ix, 1890).....                                                    | 772      |
| Lubricating, Testing Machine. (Bach.) (viii, 1889).....                                                                           | 900      |
| Lubricating, Thickening Materials for. (Marquardt.) (v, 1885).....                                                                | 539      |
| Lubricating, Valuation of. (Lew.) (x, 1891).....                                                                                  | 777      |
| Lubricating, Viscosimeter for. (Kunkler.) (xii, 1894).....                                                                        | 543      |
| Lubricating, Viscosities of Russian and American. (Redwood.) (iv, 1885).....                                                      | 77       |
| Lubricating, Viscosity of. (Traube.) (vi, 1887).....                                                                              | 414      |
| Lubricating, Viscosity of, Determination of the. (Martens.) (ix, 1890).....                                                       | 1042     |
| Mace and Nutmeg. (Semmler.) (ix, 1890).....                                                                                       | 962      |
| Machine, Sale of. (Seibert.) (ii, 1883).....                                                                                      | 481      |
| Marine, Analysis of. (Moore.) (ix, 1890).....                                                                                     | 231      |
| Maturing. (P) Leverett. (xiv, 1895).....                                                                                          | 981      |
| Mauwene's Test for. (Ellis.) (v, 1886).....                                                                                       | 150, 361 |
| Means for Extracting. (P) MacLwaine. (vi, 1887).....                                                                              | 294      |
| Medicinal, Preparation of: (P) Mackay. (vi, 1887).....                                                                            | 835      |
| (P) Radley. (iv, 1885).....                                                                                                       | 407      |
| Mentha Piperita and Mentha Viridis, Comparison of. (Trimble.) (v, 1886).....                                                      | 173      |
| Mineral, Action of Atmospheric Oxygen on. (Hirsch.) (xiv, 1895).....                                                              | 586      |
| Mineral, Adulteration of, with Chouteau. (Holde.) (x, 1891).....                                                                  | 320      |
| Mineral and Fatty, Determination of Resin Oil in. (Holde.) (x, 1891).....                                                         | 661      |
| Mineral and other, Preparation of. (P) Baillard. (vii, 1888).....                                                                 | 507      |
| Mineral and Resin, in Fats, Oils, Oleins, &c., Detection of. (Focke.) (v, 1886).....                                              | 176      |
| Mineral and Sperm, Analysis of. (Lobry de Bruyn.) (xii, 1894).....                                                                | 426      |
| Mineral, Apparatus for Bleaching or Purifying Dark. (P) Thompson. (iv, 1885).....                                                 | 275      |
| Mineral, Apparatus for Burning. (P) Chandler. (vi, 1887).....                                                                     | 815      |
| Mineral, Apparatus for Determining Flash Points of. (Gray.) (x, 1891).....                                                        | 348      |
| Mineral, Apparatus for Distilling: (P) Henderson..... (v, 1886), 376; (ix, 1890), 1120 (P) Laing. (x, 1891).....                  | 639, 631 |
| (P) Tervet. (vi, 1887).....                                                                                                       | 134      |
| Mineral, Apparatus for Refining. (P) Henderson. (ii, 1883).....                                                                   | 474      |

| Mineral, Apparatus for Separating, from other Oils. (P) Craig, Neilson, and Snodgrass. (vii, 1888).....   | 126      |
| Mineral, Apparatus for Washing, with Acids. (P) Thomson. (vi, 1887).....                                  | 591      |
| Mineral, Bromine Absorption of. (McArthur.) (vii, 1888).....                                              | 64       |
| Mineral, By-products obtained in Manufacture of. (Richter.) (ii, 1883).....                               | 473      |
| Mineral, Combustion of, in Lamps. (Kouindiy.) (xiv, 1895).....                                            | 953      |
| Mineral, Customs Duties on, in Italy. (T.R.) (x, 1891).....                                               | 732      |
| Mineral, Destructive Distillation of. (P) Laing. (x, 1891).....                                           | 531      |
| Mineral, Detection of Fat Oils in: (Lux.) (iv, 1885).....                                                 | 746      |
| (Ruhemann.) (xii, 1893).....                                                                              | 470      |
| Mineral, Discussion on the Flashing Point of. (xii, 1893).....                                            | 391      |
| Mineral, Distillation of. (P) Young and Beilby. (ix, 1890).....                                           | 278      |
| Mineral, Distillation of, and Apparatus therefor: (P) Dewar and Redwood. (ix, 1890).....                  | 731, 928 |
| (P) Laing. (x, 1891).....                                                                                 | 534      |
| Mineral, Distillation of, Method and Apparatus for. (P) Young and Beilby. (iv, 1885).....                 | 274, 275 |
| Mineral, Dyestuffs from Natural, Producing. (P) Frasch. (xii, 1893).....                                  | 756      |
| Mineral, Export of, from the United States. (T.R.) (ix, 1890).....                                        | 124      |
| Mineral, Fire-test of. (P) Smith. (ii, 1883).....                                                         | 38       |
| Mineral, Flash Point and Heat of Burning of. (xii, 1893) (Stewart.) (xi, 1892).....                       | 248, 885 |
| Mineral, Flashing Point of: (Aisimann.) (xiv, 1895).....                                                  | 284      |
| (Levinstein.) (xii, 1894).....                                                                            | 116      |
| Mineral, for Manufacturing Purposes, Preparation of. (P) Swallow. (iv, 1885).....                         | 584      |
| Mineral, Furnaces for Distilling. (P) Morton and Fyfe. (v, 1886).....                                     | 594      |
| Mineral, Gas from, Production of. (P) Young and Bell. (xii, 1893).....                                    | 666      |
| Mineral, Illuminating Gas from. (P) Young. (xii, 1894).....                                               | 934      |
| Mineral, Imperfect Solubility of, in Petroleum Spirit. (Bender.) (x, 1891).....                           | 354      |
| Mineral, in British India. (T.R.) (ix, 1890).....                                                         | 562      |
| Mineral, in Fats and Waxes, Estimation of. (Horn.) (vii, 1888).....                                       | 696      |
| Mineral, in Fats, Estimation of. (Finkener.) (v, 1886).....                                               | 457      |
| Mineral, in Russia, Consumption of. (T.R.) (vi, 1887).....                                                | 228      |
| Mineral, in Russia, Increase of Import Duty on. (T.R.) (vii, 1888).....                                   | 138      |
| Mineral, Indian Trade in. (T.R.) (viii, 1889).....                                                        | 660      |
| Mineral, Indices of Refraction of. (Holde.) (x, 1891).....                                                | 166      |
| Mineral Lubricating. (Kunkler.) (ix, 1890).....                                                           | 197, 198 |
| Mineral, Lubricating Action of, on Metals. (Aisimann.) (xiv, 1895).....                                   | 811      |
| Mineral Lubricating, Artificial. (Kraemer and Spilker.) (xi, 1892).....                                   | 22       |
| Mineral Lubricating, Conditions of Tender for Prussian State Railways. (Albrecht.) (xii, 1893).....       | 163      |
| Mineral Lubricating, Estimation of Rosin Oil in. (Storch.) (vii, 1888).....                               | 135, 136 |
| Mineral Lubricating, Flashing Point of. (Holde.) (viii, 1889).....                                        | 734      |
| Mineral Lubricating, Manufacture of. (v, 1886).....                                                       | 382      |
| Mineral Lubricating, Test of. (Falke.) (iv, 1885).....                                                    | 504      |
| Mineral Lubricating, Used in Italy. (Villavecchia, and Fabris.) (x, 1891).....                            | 390      |
| Mineral, Machine Oil and Vaseline from, Production of. (viii, 1889).....                                  | 202      |
| Mineral, Manufacture of Gas from: (P) Galletly and Armour. (xiv, 1895).....                               | 140      |
| (P) Laing. (xii, 1893).....                                                                               | 1020     |
| Mineral, Nitronaphthalene in, Detection of. (Leonard.) (xii, 1894).....                                   | 69       |
| Mineral, on Ships in the Tropics. (Lobry de Bruyn.) (xii, 1894).....                                      | 257      |
| Mineral, Purification of. (P) Roth. (iv, 1885).....                                                       | 459      |
| Mineral, Purification of, and Production of Alcohol. (P) Thompson. From Maris and Notkin. (ix, 1890)..... | 852      |
| Mineral, Pyridine Bases in. (Zaloziecki.) (xii, 1893).....                                                | 137      |
| Mineral, Qualitative Reaction of. (Holde.) (xi, 1892).....                                                | 272      |
| Mineral, Refining. (Roll.) (vi, 1887).....                                                                | 504      |
| Mineral, Removal of Sulphur from. (Riche and Roume.) (xiii, 1891).....                                    | 719      |
| Mineral, Removing Black Acid in Purification of. (Falke.) (v, 1886).....                                  | 160      |
| Mineral, Resin Content and Resinification of. (Holde.) (xiv, 1895).....                                   | 894      |
| Mineral, Resin Oil in, Determination of. (Holde.) (x, 1891).....                                          | 661      |
| Mineral, Separation of, from other Oils. (P) Craig, Neilson, and Snodgrass. (vii, 1888).....              | 126      |
| Mineral, Separation of Rosin Oil from. (Mellhiney.) (xiv, 1895).....                                      | 198      |
| Mineral, Solidification of. (P) Chenhall..... (xi, 1892), 670; (xii, 1893), 277                           |          |
| Mineral, Solubility of, in Alcohol. (Aisimann.) (xiv, 1895).....                                          | 812      |
| Mineral, Solubility of Various, in Glacial Acetic Acid. (Valenta.) (iii, 1884).....                       | 643      |
| Mineral, Sulphonic Acids from, Production of. (P) Clark. From Gewerkschaft Messel. (xi, 1892).....        | 22       |

## Oils—cont.

|                                                                                                     |      |
|-----------------------------------------------------------------------------------------------------|------|
| Mineral, Susceptibility to Resinification of. (Aisinmann.) (xiv, 1896).....                         | 282  |
| Mineral, Testing: (Hager.) (v, 1886).....                                                           | 616  |
| (Holde.) (xi, 1892).....                                                                            | 637  |
| (Valenta.) (iii, 1884).....                                                                         | 643  |
| Mineral, Treating, with Arsenical Sulphuric Acid. (Krey.) (v, 1886).....                            | 671  |
| Mineral, Treatment of: (P) Gray. (viii, 1889).....                                                  | 467  |
| (P) Green. (iv, 1885).....                                                                          | 123  |
| Mineral, Treatment of Acid Residium from. (P) Rave. (viii, 1889).....                               | 112  |
| Mineral, Treatment or Solidification of. (P) Ridsdale. (xii, 1893).....                             | 363  |
| Mineral, Turbidity in. (Veith.) (x, 1891).....                                                      | 39   |
| Mineral, Villon's Method for Purification of. (Ellin.) (xiv, 1895).....                             | 167  |
| Mineral, Viscosity of. (Krause.) (ii, 1883).....                                                    | 355  |
| Mineral, Viscosity of Black. (Holde.) (xi, 1892).....                                               | 941  |
| Naphtha, for Lighting Purposes. (Lissenko.) (ix, 1890).....                                         | 381  |
| Naphtha, Process of Extracting. (P) Evans. (x, 1891).....                                           | 471  |
| Not-drying. (Hazzara and Grussner.) (viii, 1889).....                                               | 807  |
| Nutmeg and Mace. (Semmler.) (ix, 1890).....                                                         | 962  |
| Oil and Other, Fatty Acids of. (Tatlock.) (ix, 1890).....                                           | 374  |
| Olive, Purity of, Determination of. (Lengfeld and Paparelli.) (xi, 1892).....                       | 943  |
| Olive, Testing. (Brulle.) (x, 1891).....                                                            | 390  |
| Optical Analysis of. (Amagat and Jean.) (ix, 1890).....                                             | 218  |
| Oxidation of: (P) Brin. (vi, 1887).....                                                             | 413  |
| (Livaehc.) (v, 1886).....                                                                           | 491  |
| Oxidation of, for Use in Paints, &c. (P) Thorne and Brin's Oxygen Company, Limited. (ix, 1890)..... | 1046 |
| Oxidising. (P) Schill and Seelacher. (vi, 1887).....                                                | 549  |
| Ozonised, Producing. (P) Pickenbroek. (x, 1891).....                                                | 159  |
| Paint, Preparation of. (P) Baptista. (x, 1891).....                                                 | 840  |
| Palm Nut and Cotton Seed. (iii, 1884).....                                                          | 181  |
| Paraffin, Nitrogen of. (Beilby.) (x, 1891).....                                                     | 120  |
| Paraffin, of Lignite Tar, Refining. (Von Boyen.) (ix, 1890).....                                    | 487  |
| Paraffin, Production of Gas from. (Techer.) (xiii, 1894).....                                       | 231  |
| Paraffin, Production of Hydrocarbons from. (vi, 1887).....                                          | 282  |
| Paraffin, Purification of. (P) Beilby. (iv, 1885).....                                              | 584  |
| Petroleum, Comp. of. (Mabery and Smith.) (x, 1891).....                                             | 629  |
| Petroleum, Crude. (Woodman.) (x, 1891).....                                                         | 826  |
| Petroleum, of New Zealand. (T.R.) (x, 1891).....                                                    | 394  |
| Petroleum, Tinting. (P) Phillips. (vi, 1887).....                                                   | 283  |
| Petroleum, Treatment of. (P) Labois. (xi, 1892).....                                                | 694  |
| Preserving. (P) Watel. (xiii, 1891).....                                                            | 531  |
| Purification and Bleaching of Distillable. (P) Baynes and Fearenside. (iii, 1884).....              | 438  |
| Purification of: (P) Barlow. From Chaudet. (i, 1882).....                                           | 112  |
| (P) Burton. (xiv, 1895).....                                                                        | 44   |
| (P) Lord. (vii, 1888).....                                                                          | 756  |
| (P) Villon. (xiv, 1895).....                                                                        | 665  |
| Purification of, Continuous. (Villon.) (xiii, 1894).....                                            | 745  |
| Purification of, Process and Apparatus for. (P) Wayland. (xii, 1893).....                           | 940  |
| Reaction of, with Nitrate of Silver. (Brulle.) (viii, 1889).....                                    | 924  |
| Refining and Deodorising Refuse. (P) Wilson. (xi, 1892).....                                        | 757  |
| Refining, Deodorising, and Purifying. (P) Tichenor. (iii, 1884).....                                | 33   |
| Refining Spirits from, and Apparatus therefor. (P) Somers. (x, 1891).....                           | 844  |
| Regulations Affecting Sale of, in Spain. (T.R.) (xi, 1892).....                                     | 714  |
| Removing Green Colour from. (P) Wendland. (xii, 1894).....                                          | 830  |
| Rendering, Consistent by Means of Oxygen. (P) Opperbeck. (xii, 1893).....                           | 363  |
| Resin, Indices of Refraction of. (Holde.) (x, 1891).....                                            | 166  |
| Rose, Ethyl Alcohol in German and Turkish. (Poleck.) (xii, 1893).....                               | 373  |
| Rose, German and Turkish. (Poleck.) (x, 1891).....                                                  | 269  |
| Rosin, Detection of, in Essence of Turpentine. (Zune.) (xi, 1892).....                              | 637  |
| Rosin, Distinguishing First and Second Distillation of. (Chenevier.) (ix, 1890).....                | 825  |
| Rosin, in other Oils, Detection of. (Holde.) (vii, 1888).....                                       | 526  |
| Saponifying or Mixing. (P) Sahlstrom and Parr. (xiii, 1891).....                                    | 139  |
| Shale, Bounties on Manufacture of, in France. (T.R.) (xiii, 1891).....                              | 183  |
| Seed, Brulle's Reaction for. (Holde.) (xi, 1892).....                                               | 272  |
| Seed, Mann. of, at Stuttgart. (T.R.) (vii, 1888).....                                               | 874  |
| Seed, Testing. (Brulle.) (x, 1891).....                                                             | 390  |
| Separation of, from other Substances. (P) Craig and others. (vi, 1887).....                         | 294  |
| Separation of Glycerin from. (P) Brookes. (v, 1886).....                                            | 431  |
| Shale, Purification of. (P) Urquhart. From Playfair. (ii, 1883).....                                | 239  |
| Solar, Russian, as Illuminants. (Lissenko.) (xii, 1893).....                                        | 819  |
| Solubility of Indigo in. (Proude and Wood.) (xiv, 1895).....                                        | 1027 |
| Solvent Action of Acetic Acid on. (Valenta.) (iii, 1884).....                                       | 524  |
| Spontaneous Combustion of, on Cotton. (Mackey.) (xiii, 1894, 1164; (xiv, 1895).....                 | 936  |
| Steam Treatment of. (P) Petty. (xii, 1893).....                                                     | 940  |
| Sweetening. (P) Heinz. (ix, 1890).....                                                              | 319  |
| Table, in Germany. (T.R.) (xiii, 1894).....                                                         | 80   |

## Oils—cont.

|                                                                                         |          |
|-----------------------------------------------------------------------------------------|----------|
| Tar, Examination of Phenols from Jameson Coke-Oven. (Smith.) (ii, 1883).....            | 489, 501 |
| Tar, Formation of Neutral Sulpho Ethers in Washing. (Hensler.) (xiv, 1895).....         | 358      |
| Tar, Obtaining Acids from. (P) Hardman. (v, 1886).....                                  | 426      |
| Tar, Preparing Benzene, &c. from. (P) Hlavaty and Friedmann. (x, 1891).....             | 455      |
| Tar, Rendering Soluble in Water. (P) Pannmann. (x, 1891).....                           | 380      |
| Tar, Treatment of, for Wood-Preserving Paints. (P) Avenarius. (viii, 1889).....         | 403      |
| Tar, Wood Preserving Expts. with. (Boulton.) (iii, 1881).....                           | 623      |
| Tars, &c., Manuf. of Gas from. (P) Lang. (xiv, 1895).....                               | 471      |
| Testing, Methods of. (Mullian.) (xii, 1893).....                                        | 711      |
| Tests for. (Coleman.) (v, 1886).....                                                    | 359      |
| Train, Amount of Cholesterol in. (Fahrion.) (xii, 1893).....                            | 607      |
| Train, Research on. (Fahrion.) (xii, 1893).....                                         | 935      |
| Treatment of: (P) Hageman and Palmer. (xi, 1892).....                                   | 696      |
| (P) Hartley and Blenkinsop. (xiii, 1894).....                                           | 647      |
| (P) Lake. From Blakeman. (xii, 1893).....                                               | 771      |
| Treatment of, for Use as Fuels or Illuminants. (P) McDougall. (xii, 1893).....          | 31       |
| Turkey-Red. (Benedikt-Ulzer.) (vi, 1887).....                                           | 543      |
| Turkey-Red, Analysis of. (Breinl.) (vii, 1888).....                                     | 871      |
| Turkey-Red, Composition and Action of. (Muller-Jacobs.) (iii, 1884).....                | 412, 412 |
| Turkey-Red, Composition of: (Jullard.) (xii, 1894).....                                 | 820      |
| (Liechti and Smida.) (ii, 1883).....                                                    | 540      |
| (Muller-Jacobs.) (iii, 1884).....                                                       | 412, 412 |
| Turkey-Red, of Schmitz and Toenges. (Werner.) (xii, 1893).....                          | 40       |
| Turpentine, Nature of. (Armstrong and Pope.) (x, 1891).....                             | 653      |
| Unsaponifiable, for Greasing Wool. (Spennrath.) (xiv, 1895).....                        | 362      |
| Unsaponifiable, Qualitative Detection of, in Fatty Oils. (Holde.) (xiv, 1895).....      | 890      |
| Use of Hypobromite Solution for Titration of. (Allen.) (iii, 1884).....                 | 65       |
| Utilising, as Fuel. (P) Welch. (vi, 1887).....                                          | 538      |
| Valenta's Test for. (Hurst.) (vi, 1887).....                                            | 22       |
| Vegetable. (De Negri and Fabris.) (xii, 1893).....                                      | 453      |
| Vegetable, Acidity of. (Holde.) (ix, 1890).....                                         | 900      |
| Vegetable, Bleaching. (P) Hermitte, Paterson, and Cooper. (x, 1891).....                | 1014     |
| Vegetable, Decolorising. (P) Hartley and Blenkinsop. (x, 1891).....                     | 263      |
| Vegetable, Detection of, in Lard. (Jean.) (xiv, 1895).....                              | 827      |
| Vegetable Fatty, Adulterations in. (Peters.) (viii, 1889).....                          | 64       |
| Vegetable, Importation of, into Roumania. (T.R.) (ix, 1890).....                        | 1164     |
| Vegetable, Investigation of. (Salkowski.) (vii, 1888).....                              | 37       |
| Vegetable Lubricating. (Holde.) (xi, 1892).....                                         | 271, 637 |
| Vegetable, Manufacture of: (P) Stollmeyer. (iii, 1884).....                             | 33       |
| (Trail.) (xii, 1893).....                                                               | 49       |
| Vegetable, Oxidising. (P) Walton. (x, 1891).....                                        | 713      |
| Vegetable, Refining: (P) Hall. (v, 1886).....                                           | 452      |
| (P) Scollay. (xii, 1893).....                                                           | 772      |
| Vegetable, Treatment of. (P) Scollay. (xi, 1892).....                                   | 758      |
| Viscometer for Testing Viscosity of. (Hurst.) (xi, 1892).....                           | 418      |
| Viscosimeter for Observations of. (Enzier and Kunkler.) (ix, 1890).....                 | 654      |
| Viscosity of. (Allen.) (v, 1886).....                                                   | 68       |
| Viscosity of, Effect of Cooling on. (Bender.) (x, 1891).....                            | 936      |
| Viscous, Solidifying Points of. (Holde.) (ix, 1890).....                                | 112      |
| Volatile, Adulteration of. (Langbeek.) (iii, 1884).....                                 | 574      |
| Volatile, Detection of Alcohol in. (Salzer.) (iii, 1884).....                           | 579      |
| Volatile, Oxidation of, in Atmospheric Air. (Lardsky.) (ii, 1883).....                  | 189      |
| Wintergreen and Birch. (Trimble and Schroeter.) (xiii, 1890).....                       | 915      |
| Wood, Adipic Ketone from. (Hentyschel.) (xii, 1893).....                                | 918      |
| Wood, Analysis of. (Horwitz.) (viii, 1889).....                                         | 220      |
| Oil-Cake, Converting Vegetable Residue into. (P) Lambert and Greenwood. (vi, 1887)..... | 143      |
| -Cake, Manufacture of. (P) Calthorp. (x, 1891).....                                     | 266      |
| -Cakes, Amount of Sugar in. (Burkhard.) (vi, 1887).....                                 | 145      |
| -Cakes, Proportion of Free Fatty Acid in. (Dyer and Gilbard.) (xii, 1893).....          | 8        |
| -Cloth as a Substitute for Wall Paper. (P) Pugh. (xii, 1893).....                       | 447      |
| -Cloth Printing Presses. (P) Townsend. (x, 1891).....                                   | 924      |
| -Cloths, Printing on. (P) Walker and Carver. (viii, 1889).....                          | 182      |
| -Colour Painting, Ground for. (P) Koll. (i, 1882).....                                  | 316      |
| -Sheets for Copying-Books. (P) Thomson. (xi, 1892).....                                 | 835      |
| Ointment, A New. (P) Taylor. (ix, 1890).....                                            | 299      |
| Ointments, Experiments on Preservation of Pig-Fat in. (Myhus.) (vi, 1887).....          | 141      |
| Okahero. (vii, 1888).....                                                               | 340      |
| Okra Plant, as a Substitute for Henquen. (T.R.) (ix, 1890).....                         | 427      |
| Oldenburg, Pasture Feeding in. (Tantzen.) (iv, 1885).....                               | 511      |
| Oldine Group of Hydrocarbons. (Armstrong and Miller.) (v, 1889).....                    | 574      |

|                                                                                                                               | PAGE |                                                                                            | PAGE     |

| For Baking Earthenware. (P) Moellenhoff. (xii, 1893)....                                                                | 264  |
| For Bread, Biscuits, &c. (P) Naylor. (xii, 1893).....                                                                   | 284  |
| For Burning Bricks, Pottery, &c. (P) Knowles. (iv, 1885).....                                                           | 719  |

Ovens—*cont.*

|                                                                                                   |      |
|---------------------------------------------------------------------------------------------------|------|
| For Burning Earthenware, Lime, &c. (P) Burghardt. (i, 1882).....                                  | 189  |
| For Burning Limestone Bricks, &c. (P) Hargreaves, Beckett, and Cliff. (iv, 1885).....             | 283  |
| For Burning Sanitary Ware. (P) Armstrong. (xi, 1892).....                                         | 524  |
| For Charring Wood, &c. (P) Lippe. (i, 1882).....                                                  | 142  |
| For Drying in Hydrogen. (Morse.) (xiii, 1894).....                                                | 174  |
| For Drying Peat Briquettes. (P) Stauber. (xiii, 1894).....                                        | 715  |
| For Firing Ceramic Ware. (P) Hanquimux. (xiii, 1894).....                                         | 1048 |
| For Firing Glass, &c. (P) Parfitt. (x, 1891).....                                                 | 465  |
| For Firing Pottery:                                                                               |      |
| (P) Plant. (xi, 1892).....                                                                        | 434  |
| (P) Wilkinson. (x, 1891).....                                                                     | 548  |
| For Firing Terra-cotta, &c. (P) d'Enghein. (xi, 1892).....                                        | 524  |
| For Lime-Burning, Chamber. (P) Arnold. (i, 1882).....                                             | 233  |
| For Making Coke or Charcoal. (P) Armour. (xi, 1892).....                                          | 806  |
| For Treatment of Carbonaceous Substances. (P) Stier. (iv, 1885).....                              | 199  |
| Hot-Air. (P) Lonholdt. (i, 1882).....                                                             | 491  |
| Lids, Doors, or Covers for Gas. (P) Westwood and Wright. (viii, 1889).....                        | 451  |
| Metallurgical. (P) Bates. (xi, 1892).....                                                         | 615  |
| Recent Improvements in Coke. (i, 1883).....                                                       | 322  |
| Results of Improved Coke. (P.R.) (xi, 1892).....                                                  | 379  |
| Travelling Platforms, &c. for. (P) Fellner and Zeigler. (viii, 1889).....                         | 531  |
| Utilisation of Gases from Coke. (P) Nicholson. (iii, 1881).....                                   | 369  |
| <i>See also under Furnaces, Kilns, and Retorts.</i>                                               |      |
| Owens College, Opening of the Schorlemer Organic Laboratory in the. (xiv, 1895).....              | 552  |
| Owens, Determination of Tannic Acid in. (Gawalowski.) (ii, 1883).....                             | 183  |
| Oxalate Test for Quinine Salts. (Schafer.) (vi, 1887).....                                        | 522  |
| Oxalates, Production of. (P) Abel. From Schwengers Sohne. (vi, 1887).....                         | 375  |
| Treating Water with Alkali. (Macnab and Beckett.) (v, 1886).....                                  | 267  |
| Oxalic Acid:                                                                                      |      |
| (T.R.) (ix, 1890).....                                                                            | 566  |
| (Deghane.) (xii, 1893).....                                                                       | 534  |
| Acid, a By-product of Manufacture of Aniline. (Hirsch.) (vii, 1888).....                          | 498  |
| Acid, Action of Light on. (Richardson.) (xiii, 1894).....                                         | 516  |
| Acid, Action of, on Inulin. (Dull.) (xiv, 1895).....                                              | 589  |
| Acid and Cellulose, Simultaneous Production of. (P) Litschütz. (xi, 1892).....                    | 176  |
| Acid as a Means of Isolating Alkaloids. (Alessandri.) (ii, 1883).....                             | 362  |
| Acid as a Test for Arseniates. (Patrouillard.) (i, 1882).....                                     | 516  |
| Acid, Combination of, with Alumina. (Koechlin and Mathieu-Flessy.) (iv, 1885).....                | 494  |
| Acid, Decomposition of, by Ferric Salts. (Lemoine.) (xii, 1893).....                              | 760  |
| Acid, Formation of, in Vegetation. (Berthelot and André.) (v, 1886).....                          | 511  |
| Acid in Dresden. (T.R.) (vii, 1888).....                                                          | 649  |
| Acid in Germany. (T.R.) (xii, 1893).....                                                          | 963  |
| Acid in Potatoes and Malt. (Siewert.) (iii, 1884).....                                            | 184  |
| Acid, Preparation of. (P) Plater-Syberg. (xiv, 1895).....                                         | 157  |
| Acid, Production of, from Molasses, &c. (P) Meyer. (viii, 1889).....                              | 128  |
| Acid, Recovery of, from Spiritus Aetheris Nitrosi. (Frickhinger.) (vi, 1887).....                 | 381  |
| Acid, Specific Gravity of. (Gorlach.) (v, 1886).....                                              | 602  |
| Acid, Synthesis of. (Merz and Weith.) (i, 1882).....                                              | 319  |
| Acid, Thymol as Preservative for. (Gorlach.) (x, 1891).....                                       | 25   |
| Acid, Use of Anhydrous, in Forming Condensation Products. (Anschutz.) (iii, 1884).....            | 439  |
| Acid, Use of, in Wool Dyeing. (Körner.) (xiv, 1895).....                                          | 1044 |
| And Hydrochloric Acids, Relative Affinities of, for Ferric Oxide. (Lemoine.) (xii, 1893).....     | 760  |
| Oxanthranol, Tetracet. (Liebermann.) (vii, 1888).....                                             | 384  |
| Oxazine Colouring Matters. (Nietzki and Bossi.) (xii, 1894).....                                  | 137  |
| Dyes. (Möhlau.) (xi, 1892).....                                                                   | 672  |
| Series, Derivatives of the. (Lauth.) (xiii, 1894).....                                            | 628  |
| Series, Synthesis in the. (Knorr.) (viii, 1889).....                                              | 1004 |
| Oxazines and Eorhodines, Derivatives of. (Lauth.) (xiv, 1895).....                                | 25   |
| Oxidation Compounds of Amidonaphthol Sulphonic Acids. (Reverdin and de la Harpe.) (xi, 1892)..... | 997  |
| Oxide Paints, Manufacture of Red. (P) D'Andria. (xiii, 1894).....                                 | 262  |
| Oxides and Salts, Electrolytic Production of. (P) Luckow. (xiv, 1895).....                        | 975  |
| Apparatus for Producing Ferro-Ferric and Ferric. (P) Crossley. (xiv, 1895).....                   | 157  |
| Behaviour of Metallic, at High Temperature. (Moissan.) (xii, 1893).....                           | 383  |
| Converting Metallic, into Solid Ores. (P) Henschel. (xii, 1893).....                              | 695  |
| Cowle's Method for Reducing Bivalent. (Sommaruga.) (viii, 1889).....                              | 196  |
| Extraction of Metals from. (P) Vantin. (xiv, 1895).....                                           | 582  |
| Furn. of Organic. (P) Lorrain. (vi, 1887).....                                                    | 377  |
| Manufacture of Metallic:                                                                          |      |
| (P) Bonneville. From Fenchoux. (iii, 1884).....                                                   | 32   |
| (P) de Pass. From Thofelarn. (xiii, 1894).....                                                    | 158  |
| Metallic, for Detection of Colours in Wine. (Cazeneuve.) (v, 1886).....                           | 178  |

Oxides—*cont.*

|                                                                                                                                                           |         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Of Copper and Iron, Manufacture of, from Pyrites. (P) Brin. (vi, 1887).....                                                                               | 597     |
| Of the Alkali Metals, Manufacture of. (P) Castner. (xi, 1892).....                                                                                        | 1005    |
| Reducing Metallic. (Greene and Wahl.) (xii, 1893).....                                                                                                    | 1037    |
| Treatment of Incandescent Bodies Formed of Metallic, for Increasing their Luminosity and Resistance. (P) Inury. From Welsbach. (vii, 1888).....           | 315     |
| Oxidimetric Method of Estimating Manganese. (Carnot.) (xii, 1893).....                                                                                    | 787     |
| Oxidising Apparatus. (P) Stewart. (xiv, 1895).....                                                                                                        | 863     |
| Oxindes, Pharmacology of the Organic. (Pomfret.) (xii, 1893).....                                                                                         | 1054    |
| Oxidophenolic Colouring Matters from Gallamide and Galloparatoluide. (Cazeneuve.) (xiii, 1894).....                                                       | 720     |
| Oxines of Camphors, Manufacture of $\beta$ -Cymidine from. (P) Abel. From Haarmann and Reimer. (xii, 1893).....                                           | 918     |
| Oxaldehydes, Manufacture of Compounds of $\beta$ -amidophenol Ethers and Aromatic. (P) Inury. From Society of Chemical Industry, Basle. (xiii, 1894)..... | 274     |
| Oxyanthraquinone, Production of. (P) Inury. From Farbwerke vormals Meister, Lucius and Brüning. (xiii, 1894).....                                         | 875     |
| Production of $\alpha$ . (P) Inury. From Farbwerke vormals Meister, Lucius and Brüning. (xiv, 1895).....                                                  | 263     |
| Oxyanthraquinones, Chromogenic Properties of. (Liebermann and Kostanecki.) (vi, 1887).....                                                                | 724     |
| Preparation and Chromogenic Properties of. (Liebermann and Kostanecki.) (vi, 1887).....                                                                   | 818     |
| Oxyazo Compounds. (Meyer and Kreis.) (ii, 1883).....                                                                                                      | 376     |
| Comp., Formul. of. (Fischer and Wimmer.) (vi, 1887).....                                                                                                  | 659     |
| Oxycedilose. (Nothling.) (iv, 1890).....                                                                                                                  | 56      |
| Notes on. (Flint and Tolens.) (xii, 1893).....                                                                                                            | 549     |
| Preventing Formation of, in Dyeing. (Brundt.) (xi, 1892).....                                                                                             | 33      |
| Properties of. (Witz and Osmond.) (v, 1886).....                                                                                                          | 546     |
| Report on Competition for Preventing Formation of, in Dyeing. (Scheurer.) (xi, 1892).....                                                                 | 32      |
| Report on Nastukoff's Study of. (Scheurer and Nothling.) (xii, 1893).....                                                                                 | 516     |

| Production of. (P) Brin Freres. (i, 1882).....                                                                | 59   |
| Production of, by Electrolysis. (P) Gareith. (xii, 1893).....                                                 | 768  |
| Production of, by Electrolysis of Water. (P) Latchinoff. (ix, 1890).....                                      | 196  |
| Production of, from Air:                                                                                      |      |
| (P) Brin's Oxygen Co. and Murray. (xiii, 1894).....                                                           | 836  |
| (P) Chapman. (xii, 1893).....                                                                                 | 863  |
| Production of, from Phosphates of Calcium, Barium, &c. (P) Heuser. From Kassner. (viii, 1889).....            | 885  |
| Reaction between Nitric Oxide and. (Lumae.) (iv, 1885).....                                                   | 593  |
| Reagent for Absorption of. (Pfordner.) (iv, 1885).....                                                        | 419  |
| Reducing Metals Containing. (P) Reichwald. From Krupp. (xiv, 1895).....                                       | 663  |
| Rendering Oils Consistent by Means of. (P) Ojderbeck. (xii, 1893).....                                        | 363  |
| Sensitive Reagents for Detecting. (Wurster.) (vi, 1887).....                                                  | 301  |
| Separ. of, in Leaves of Crassulaceae. (Mayer.) (iv, 1885).....                                                | 604  |
| Solubility of, in Water. (Winkler.) (viii, 1889).....                                                         | 727  |
| Utilisation of Atmospheric. (Kassner).....(ix, 1890), 187; (x, 1891).....                                     | 380  |
| Water, and Carbon Monoxide Gases, Interaction of. (Armstrong.) (v, 1886).....                                 | 370  |
| Oxyhydrogen Light, Saturators and Jets for Producing. (P) Suiter. (xii, 1894).....                            | 874  |
| Light, Zirconia as Substitute for Lime in. (Kochs.) (x, 1891).....                                            | 37   |
| Oxylinoic Acid, Mulder's (Bancroft and Hazura.) (vii, 1888).....                                              | 681  |
| Oxymethoxybenzoic Acid, Production of. (P) von Heyden Nachfolger. (ix, 1890).....                             | 385  |
| Oxynaphthoic Acid, a: A New Anti-septic. (Ellenberger and Holmester.) (vii, 1888).....                        | 130  |
| Oxynaphthol and Aniline, Treatment of, for Producing Dyes. (P) Annheim. (vi, 1887).....                       | 726  |
| Oxyphthalic Acid, Manufacture of. (P) Johnson. From von Heyden. (x, 1891).....                                | 791  |
| Oxyprazines, Manufacture of. (P) Abel. From The Farbwerke vormals Meister, Lucius und Brunn. (iii, 1884)..... | 568  |
| Oxypropionic Acid, Product of Cellulose Decomposition. (Will.) (x, 1891).....                                 | 578  |
| Oxyquinoline Carbonates, Manufacture of. (P) Johnson. From von Heyden Nachfolger. (v, 1886).....              | 616  |
| Manuf. of Ortho. (P) Lombach and others. (x, 1891).....                                                       | 792  |
| -Phenol-Sulphonic-Oxyquinoline, Manufacture of. (P) Lombach and Wolff. (xii, 1893).....                       | 258  |
| Oxynitric Acid, Manufacture of Alpha-. (P) Johnson. From von Heyden Nachfolger. (xii, 1893).....              | 441  |
| Oxywrightite. (Warnecke.) (vii, 1888).....                                                                    | 585  |
| Oxycanthones, Constitution of the Mono. (Dreher and Kostanecki.) (xii, 1893).....                             | 440  |
| Synthesis of. (Kostanecki and Nessler.) (x, 1891).....                                                        | 915  |
| Ozokerite. (Gosling.) (xiv, 1895).....                                                                        | 741  |
| Action of Sulphuric Acid on. (Zaloznecki.) (vi, 1887).....                                                    | 652  |
| American. (T.R.) (viii, 1889).....                                                                            | 315  |
| And Ceresin of Galicia. (Hager.) (ii, 1883).....                                                              | 473  |
| And Petroleum in Galicia. (Katem.) (viii, 1889).....                                                          | 768  |
| And Petroleum Industries of Galicia. (Redwood.) (xi, 1892).....                                               | 463  |
| Bleaching. (P) Murray. From Chemin. (iii, 1884).....                                                          | 163  |

## Ozokerite—cont.

|                                                                                    |          |
|------------------------------------------------------------------------------------|----------|
| Extraction of, in Galicia. (Sholsky.) (ix, 1890).....                              | 597      |
| In the United States in 1888. (T.R.) (viii, 1889).....                             | 590      |
| Industry, The. (Sauerlandt.) (ii, 1883).....                                       | 238      |
| Investigation of Utah. (Seal.) (x, 1891).....                                      | 129      |
| New Occurrences of. (Lach.) (viii, 1889).....                                      | 626      |
| Nitrogen in Galician. (Beilby.) (x, 1891).....                                     | 120      |
| Preparing Benzene, &c. from. (P) Ilawaty and Friedmann. (x, 1891).....             | 455      |
| Production of, in the United States:                                               |          |
| (Parker.) (x, 1891).....                                                           | 910      |
| (T.R.) (x, 1891).....                                                              | 736      |
| Refining. (Redl.) (vi, 1887).....                                                  | 504      |
| Valuation of. (Lach.) (iv, 1885).....                                              | 488      |
| Ozokerites, Treatment of. (P) Labois. (xi, 1892).....                              | 694      |
| Ozone, Action of, on Guaiacum Resin. (Kawalowsky.) (viii, 1889).....               | 480      |
| Apparatus for Producing:                                                           |          |
| (P) Fahrigh and Billing. (ix, 1890).....                                           | 101      |
| (P) Kattenhoy. (xiii, 1894).....                                                   | 414      |
| (P) Mewburn. From Teillard. (vi, 1887).....                                        | 831      |
| (P) Siemens and Halske. (xi, 1892).....                                            | 535      |
| (P) Vars. (viii, 1889).....                                                        | 624      |
| Apparatus for Production of, by Means of Phosphorus. (P) Poulsen. (xii, 1893)..... | 289      |
| Application of. (Fröhlich.) (xiv, 1895).....                                       | 164      |
| Determination of. (Behrend and Kast.) (viii, 1889).....                            | 136      |
| For Bleaching, Production of. (P) Hagen. From Brin. (i, 1882).....                 | 187      |
| Formation of. (P) Schneller and Wisse. (xi, 1892).....                             | 354      |
| Formation of, at High Temperatures. (Brunck.) (xiii, 1894).....                    | 170      |
| Generator for. (P) Davidson. (i, 1882).....                                        | 160      |
| Manufacture of. (P) Brin. (vi, 1887).....                                          | 676      |
| Product formed by Action of, on Ammonia. (Nagy-Ilosva.) (xiv, 1895).....           | 501      |
| Production of:                                                                     |          |
| (P) Donovan and Gardner. (xiv, 1895).....                                          | 42       |
| (P) Johnson. From Hermite. (vi, 1887).....                                         | 286, 290 |
| (P) Yarnold. (xiv, 1895).....                                                      | 184      |
| Production of, and Apparatus therefor. (P) Schneller and Wisse. (xiv, 1895).....   | 279      |
| Production of, by Electricity:                                                     |          |
| (P) Andreoli. (xiii, 1894).....                                                    | 169      |
| (P) Lamprey. (xiv, 1895).....                                                      | 585      |
| Prod. of Vinegar by Means of. (P) Andreoli. (xiv, 1895).....                       | 879      |
| Solubility of. (Mallfert.) (xiv, 1895).....                                        | 381      |
| Water, and Manufacture of Same. (P) Dietrich. (x, 1891).....                       | 725      |
| Water, Producing. (P) Graf and Pickenbrock. (ix, 1890).....                        | 214      |
| Ozonisers, Manufacture of Electrodes for. (P) Andreoli. (xii, 1893).....           | 452      |
| Ozonising Apparatus:                                                               |          |
| (P) Ehliis. (xi, 1892).....                                                        | 769      |
| (P) Guenet. (x, 1891).....                                                         | 725      |

| Making, Determination of Fibres Used in. (Herzberg.) (xi, 1892) .....                   | 638                                 |
| Making from Esparto, Straw, &c. (P) Dahl. (viii, 1889) .....                            | 814                                 |
| Making Impervious to Water. (P) Boulton. From Macdonald and Tassie. (ix, 1890) .....    | 870                                 |
| Making in Bombay. (T.R.) (xiv, 1895) .....                                              | 436                                 |
| Making in Turkey, Concession for. (T.R.) (vi, 1887) .....                               | 569                                 |
| Making Invention in Japan. (T.R.) (vi, 1887) .....                                      | 308                                 |
| Making, Lignous Cellulose for. (P) Clark. From Blitz. (iii, 1884) .....                 | 190                                 |
| Making Machines, Registering Apparatus for. (P) Richardson. (x, 1891) .....             | 566                                 |
| Making, Manufacture of Pulp for. (P) Cornett. (xii, 1893) .....                         | 859                                 |
| Making, Manufacture of Substance Suitable for. (P) Hagemann. (xii, 1893) .....          | 144                                 |
| Making Material, Wood as a. (Reid.) (v, 1886) .....                                     | 273, 349                            |
| Making Materials, Boiler for Treating. (P) Sinclair. (xiii, 1894) .....                 | 754                                 |
| Making Materials, Cleansing. (P) Hamilton. (ix, 1890) .....                             | 211                                 |
| Making Materials, Mineral Constituents of. (Herzberg.) (ix, 1890) .....                 | 760                                 |
| Making Materials, Treatment of. (P) Mallory. (vii, 1888) .....                          | 639                                 |
| Making, Moulds for. (P) Grenu. (x, 1891) .....                                          | 380                                 |
| Making, Potato-Starch Residue for. (Herzberg.) (xi, 1892) .....                         | 934                                 |
| Making, Preparation of Cellulose for: (P) Coethen. (iv, 1885) .....                     | 241                                 |
| (Flodquist.) (iv, 1885) .....                                                           | 241                                 |
| Making, Preparation of Sulphate of Lime for. (P) Knowles. (iv, 1885) .....              | 610                                 |
| Making, Preparation of Woodstuff for. (ii, 1883) .....                                  | 359                                 |
| Making, Production of Vegetable Fibres for. (P) Graham. (ii, 1883) .....                | 276                                 |
| Making, Pulp-Strainers for. (P) Torrance and Hervell. (xii, 1893) .....                 | 926                                 |
| Making, Pure Water for. (ii, 1883) .....                                                | 249                                 |
| Making, Treatment of Wood for. (P) Ekuani. (i, 1882) .....                              | 189                                 |
| Making, Use of Alumina in. (i, 1882) .....                                              | 75                                  |
| Making, Woodstuff for. (P) Rasch and Kirchner. (i, 1882) .....                          | 336                                 |
| Manilla, Manufacture of. (P) Atherton. From Beck. (x, 1891) .....                       | 268                                 |

|---------------------------------------------------------------------------------------------------------|------|
| Manufacture and Treatment of Sensitive. (P) Shawcross. (iv, 1885) .....                                 | 363  |
| Manufacture, Moisture in Materials for. (Lepsius.) (iv, 1885) .....                                     | 751  |
| Manufacture, New Processes in. (Haussner.) (ix, 1890) .....                                             | 1145 |
| Manufacture of: (P) Cornett. (xiv, 1895) .....                                                          | 593  |
| (P) Craig. (ix, 1890) .....                                                                             | 819  |
| (P) Dixon. (iii, 1884) .....                                                                            | 376  |
| (P) Hargreaves and Hewlett. (xiv, 1895) .....                                                           | 768  |
| (P) Hayles. (x, 1891) .....                                                                             | 944  |
| (P) Holden. (xii, 1893) .....                                                                           | 780  |
| (P) Johnson. From Andre. (iv, 1885) .....                                                               | 241  |
| (P) Moritz. (vi, 1887), 558; (viii, 1889) .....                                                         | 634  |
| (P) Tidcombe. (i, 1882) .....                                                                           | 198  |
| (P) Weyzang. (x, 1891) .....                                                                            | 943  |
| (P) Wilkinson. (iv, 1885) .....                                                                         | 242  |
| Manufacture of, and Apparatus therefor. (P) Bechmann. (x, 1891) .....                                   | 944  |
| Manufacture of, in China. (T.R.) (xii, 1893) .....                                                      | 299  |
| Manufacture of, in Japan. (Martens.) (ix, 1890) .....                                                   | 210  |
| Manufacture of, Method and Apparatus for. (P) Wheeler. (xii, 1894) .....                                | 539  |
| Manufacture, Recovering Chemicals from Waste Water of. (P) Alkier. (ix, 1890) .....                     | 540  |
| Manufacture, Sorting Cylinder for. (P) Hold. (i, 1882) .....                                            | 423  |
| Material for Manufacture of, New. (x, 1891) .....                                                       | 565  |
| Material, Manufacture of Waterproof. (P) Murray. From Benedix and Bary. (xii, 1893) .....               | 946  |
| Materials for Manufacture of, Treatment of: (P) Appleearth. (x, 1891) .....                             | 268  |
| (P) May. (i, 1882) .....                                                                                | 496  |
| Medicating and Disinfecting. (P) Cosley. (ix, 1890) .....                                               | 408  |
| Metal-surfaced, Manufacture of. (P) Endruweit. (xii, 1893) .....                                        | 462  |
| Microscopic Examination of: (Herzberg.) (ix, 1890) .....                                                | 112  |
| (Weisner.) (vii, 1888) .....                                                                            | 515  |
| Microscopic Method of Testing. (Bohncl.) (viii, 1889) .....                                             | 564  |
| Mill, An American Sulphite Cellulose. (Wildhagen.) (xi, 1892) .....                                     | 174  |
| Mills, Devil Machines used in. (P) Karschilgen. (i, 1882) .....                                         | 423  |
| Mills in Japan. (T.R.) (xi, 1892) .....                                                                 | 552  |
| Mills, Indian. (T.R.) (xi, 1893) .....                                                                  | 961  |
| Mills, Treatment of Ash from. (P) Kynaston and Sutherland. (ix, 1890) .....                             | 408  |
| Mills, Use of the Edge Runner in. (Muth.) (ix, 1890) .....                                              | 886  |
| Mills, Visit to Cowan and Sons and Brown and Co's. (xiii, 1894) .....                                   | 700  |
| Mills, Visit to Johnson and Co's. (iv, 1885) .....                                                      | 445  |
| Money, Prep. of New Russian. (Hallensleben.) (ix, 1890) .....                                           | 700  |
| Nitrocellulose in Filters. (Cramer.) (xiii, 1894) .....                                                 | 833  |
| Parchment, Manufacture of. (xiii, 1894) .....                                                           | 414  |
| Pastes, Duty on, in France. (T.R.) (vi, 1887) .....                                                     | 151  |
| Photographic Printing. (Artizans.) (xiii, 1894) .....                                                   | 759  |
| Photographic Printing, Manufacture of. (P) Locke. From Arndt and Troost. (xiv, 1895) .....              | 769  |
| Photographic, Production of Finely Granulated. (P) Thompson. From Schaufelen. (xiii, 1894) .....        | 513  |
| Physical Alterations in, by Heat and Moisture. (Balen.) (xiv, 1895) .....                               | 8    |
| Physical Changes of, when Stored. (Herzberg.) (ix, 1890) .....                                          | 803  |
| Preparing Yellow. (P) Musil. (ii, 1883) .....                                                           | 359  |
| Presence of Residual Chemicals in. (Irvine and Woodhead.) (xiii, 1894) .....                            | 131  |
| Printing on. (P) Walker and Carver. (viii, 1889) .....                                                  | 159  |
| Printing on Prepared. (P) Degroot and Durant des Aulpois. (xiv, 1895) .....                             | 285  |
| Producing Marble Pattern on. (P) Blake and others. (ix, 1890) .....                                     | 289  |
| Pulp. See under Pulp.                                                                                   |      |
| Quality and Examination of. (Hoyer.) (ii, 1883) .....                                                   | 359  |
| Raw Material for Manufacture of. (Herzberg.) (xiv, 1895) .....                                          | 675  |
| Rendering, Impermeable and Transparent. (P) De Pass. From La Société de L'usage Lebre. (vi, 1887) ..... | 519  |
| Rendering, Sensitive to Light. (P) Junk. (xiii, 1894) .....                                             | 173  |
| Rendering, Transparent. (P) Woodbury and Vezara. (v, 1886) .....                                        | 456  |
| Rendering, Wat-proof but not Air-tight. (P) Alexander-son. (iv, 1885) .....                             | 532  |
| Resembling Leather, Manufacture of. (P) Thompson. From The Goppinger Papier Fabrik. (xii, 1893) .....   | 706  |
| Resin Sizing, and Durability of. (xiv, 1895) .....                                                      | 1059 |
| Rise of Salt Solutions in Bileulous. (Fischer and Schmidt-mer.) (xii, 1893) .....                       | 624  |
| Rosin-size in, Estimating Quantity of. (Herzberg.) (xi, 1892) .....                                     | 638  |
| Safety, Manufacture of. (P) Jameson. (vii, 1888) .....                                                  | 864  |
| Sanitary: (P) Hannan. (ix, 1890) .....                                                                  | 644  |
| (P) Quilliam. (xii, 1894) .....                                                                         | 834  |
| Sensitive, for Use in Photography, Preparation of. (P) Warnecke. (v, 1886) .....                        | 97   |
| Sizing: (Herzberg.) (ix, 1890) .....                                                                    | 98   |
| (P) Mitscherlich. (iv, 1885), 550; (x, 1891) .....                                                      | 787  |

(xiii, 1894).....                                                                                                       | 900  | Phenylacetylene, Artificial In Lico from. (P) Badische Anilin und Soda Fabrik. (ii, 1883).....                                  | 243  |
| Combination of Tetrazo Compounds with. (P) Paul. (vii, 1888).....                                                                                          | 432  | Synthesis by Means of. (Bayer and Landsberg.) (i, 1882).....                                                                    | 104  |
| Combinations of, with Benzyltrichloride. (Dobner.) (ix, 1890).....                                                                                         | 496  | Phenyl-amido-acetic Acid, Manufacture of Derivatives of. (P) Wilcox. From The Farbwerke vormals F. Bayer and Co. (x, 1891)..... | 383  |
| Compounds of Fatty Acids with. (Nencki.) (ix, 1890).....                                                                                                   | 411  | Phenylamidoazobenzene and its Derivatives, Manufacture of. (Briggs.) (xiv, 1895).....                                           | 851  |
| Compounds of Mercury with. (Merck.) (viii, 1889).....                                                                                                      | 722  | Sulphonic Acids, Production of. (P) Dahl and Co. (ii, 1883).....                                                                | 243  |
| Compounds of Phthalic Acid with. (Bayer.) (i, 1882).....                                                                                                   | 446  | Phenylamido-oxynaphthalene Sulpho Acid, Production of. (P) Pitt. From Cassella and Co. (xiv, 1895).....                         | 566  |
| Compounds of Quinoline with. (Hock.) (ii, 1883).....                                                                                                       | 265  | Phenylamidopropionic Acid. (Schulze and Barbieri.) (iii, 1884).....                                                             | 323  |
| Compounds of Sugar with Polyhydric. (Fischer and Jennings.) (xiii, 1894).....                                                                              | 765  | Phenylamines and Phenols, Compounds of Benzotrichloride with. (Dobner.) (ii, 1883).....                                         | 272  |
| Compounds of, with Amido-bases. (Dale and Schorlemmer.) (ii, 1883).....                                                                                    | 268  | Green Dyestuffs from Tertiary. (P) Actien-Gesellschaft für Anilinfabrikation. (i, 1882).....                                    | 403  |
| Condensation of Aromatic Aldehydes with. (Trzinski.) (iii, 1884).....                                                                                      | 252  | Production of. (P) Vidal. (xi, 1892).....                                                                                       | 344  |
| Contained in Coal Tar, High-Boiling. (Noelting.) (iii, 1884).....                                                                                          | 231  | Phenylaz tetrahydro- $\alpha$ -naphthoquinoline. (Bamberger and Stettenhener.) (vi, 1892).....                                  | 23   |
| Detection of. (Lanbert.) (xii, 1893).....                                                                                                                  | 713  | Phenyl- $\beta$ naphthylamine, Azo-Colouring Matters from. (Nesser.) (xiv, 1895).....                                           | 26   |
| Determination of. (Messinger and Vortmann.) (ix, 1890).....                                                                                                | 1070 | Azo-Derivatives of. (Zinke.) (ix, 1890).....                                                                                    | 229  |
| Dichlorines from. (Brunner and Chuit.) (vii, 1888).....                                                                                                    | 670  | Phenylcoumalin and Piceton of Coto-Bark. (Clamician and Silber.) (xiv, 1895).....                                               | 884  |
| Dyestuffs from, Preparation of. (P) Geigy. (i, 1882).....                                                                                                  | 404  | Phenylhydrazones, Isomeric. (Kostanecki.) (vii, 1888).....                                                                      | 838  |
| Ethyl. (Behal and Choy.) (xiii, 1894).....                                                                                                                 | 794  | Phenylidimethylpyrazolone $\beta$ -resorcyate. (Pettit and Fèvre.) (xiii, 1894).....                                            | 902  |
| From Carbolic Oils, Yields of. (Smith.) (ii, 1883).....                                                                                                    | 501  | Manufacture of. (P) Schelven and Riedel. (x, 1891).....                                                                         | 656  |
| From Creosote Oils, Results of Fractional Distillation of. (Smith.) (ii, 1883).....                                                                        | 497  | Salicylate, Manufacture of. (P) Lütke and Riedel. (x, 1891).....                                                                | 655  |
| From Jameson Coke Oven Tar Oils, Examination of. (Smith.) (ii, 1883).....                                                                                  | 499  | Phenylenediamine, Azo- and Diazo-Compounds derived from. (Wallach and Schulze.) (ii, 1883).....                                 | 268  |
| Introducing Benzene Residue into Nucleus of. (P) Liebmann. (i, 1882).....                                                                                  | 402  | $\beta$ -Dinaphthyl- <i>p</i> -. (Rueff.) (viii, 1889).....                                                                     | 452  |
| Iodine Compounds from, Production of. (P) Newton. From Farbenfabriken vormals F. Bayer and Co. (xii, 1893).....                                            | 785  | Condensation Derivatives of <i>m</i> -. (Gaess and Elsaesser.) (xii, 1893).....                                                 | 749  |
| Iodine Substitution Products of, Production of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (xi, 1892).....                               | 370  | <i>m</i> -, as a Reagent for Oxygen. (Cazeneuve.) (x, 1891).....                                                                | 796  |
| Mono-iodo-. (Noelting and Stricker.) (vii, 1888).....                                                                                                      | 562  | Monomethyl- <i>para</i> -. (Jernthsen and Goske.) (vi, 1887).....                                                               | 566  |
| New Ethers of. (Staedel.) (ii, 1883).....                                                                                                                  | 314  | Oxidation of <i>o</i> -. (Fischer and Hepp.) (ix, 1890).....                                                                    | 662  |
| Nitro- and Amido-, Preparation of. (P) Deninger. (viii, 1889).....                                                                                         | 588  | <i>Para</i> -, Development with. (Eder.) (ix, 1890).....                                                                        | 102  |
| Of Fluorene and Acenaphthene. (P) Holliday and Hodgkinson. (iii, 1884).....                                                                                | 319  | <i>Para</i> -, Dyeing Hair and Feathers with. (P) Erdmann. (ix, 1890).....                                                      | 174  |
| Periodides of, Manufacture of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (ix, 1890), 412; (xii, 1893).....                              | 460  | Physiological Action of <i>Para</i> - and <i>Meta</i> -. (Dubois and Vignon.) (vii, 1888).....                                  | 765  |
| Poly-, Blue Reactions of the. (Cazeneuve.) (xiii, 1894).....                                                                                               | 1098 | Solutions, Preservation of <i>m</i> -. (Deniges.) (xi, 1892).....                                                               | 848  |
| Preparation of. (P) Actien-Gesellschaft für Anilinfabrikation. (i, 1882).....                                                                              | 226  | Tetramethyl-. (Tohl.) (vii, 1888).....                                                                                          | 381  |
| Presence of High-Boiling, in Coal-Tar. (Schulze.) (iv, 1885).....                                                                                          | 333  | Tetramethyl- <i>para</i> -, Estimation of Active Oxygen by Means of. (Wurster.) (vii, 1888).....                                | 404  |
| Production of Colouring Matters by Action of Aromatic Nitro Substitution Products on. (Brunner.) (i, 1882).....                                            | 102  | Phenylester of Benzoylamido Phenyl Acetic Acid. (Weiss.) (xiii, 1894).....                                                      | 57   |
| Reaction of Some, in Presence of Chloroform and Alkali. (ix, 1890).....                                                                                    | 974  | Phenylestersalicylic Acid, Prep. of. (P) Ernst. (x, 1891).....                                                                  | 1026 |
| Reactions of Chelidonium with. (Battandier.) (xiv, 1895).....                                                                                              | 398  | Phenylglucosazone, Estimation of Dextrose, Levulose, and Cane Sugar as. (Lintner and Kroker.) (xiv, 1895).....                  | 690  |
| Sulpho-conjugated, Derived from Camphor. (Cazeneuve.) (ix, 1890).....                                                                                      | 647  | Phenyl-glycocoll, Manufacture of Artificial Indigo from. (P) Johnson. From The Badische Anilin und Soda Fabrik. (x, 1891).....  | 633  |

| Action of Ethyl Succinylsuccinate on. (Knorr and Bulow.) (iv, 1885).....                                                                | 61                                  | Slag, Thomas, as a Manure. (Smith.) (v, 1886).....                                                       | 464      |
| Action of Nitroso-Bases on. (Fischer and Wacker.) (viii, 1889).....                                                                     | 387                                 | Soluble Alkaline, Obtaining from Mineral Phosphates. (P) Drevermann. (i, 1882).....                      | 150      |
| Action of, on Tannin Extracts. (Bottinger.) (ix, 1890).....                                                                             | 955                                 | Solubility of Tri- and Bicalcium. (Causse.) (xi, 1892).....                                              | 685, 760 |
| And Lignoin, Colour Reaction of. (Nickel.) (xii, 1893).....                                                                             | 869                                 | Tricalcium, Transformation of, into Chlorine Compounds of Phosphorus. (Ribau.) (ii, 1883).....           | 177      |
| As a Reagent. (Fischer.) (iii, 1884).....                                                                                               | 331                                 | Tricalcium, Behaviour of, towards Carbonic Acid and Ferric Hydroxide. (von Georgievics.) (xi, 1892)..... | 254      |
| As Discharge on Bistre. (Schaeffer.) (iv, 1885).....                                                                                    | 207                                 | Value of Aluminium, from Grand Comtétable. (Andeuard.) (xiv, 1895).....                                  | 374      |
| Behaviour of Inverted Raffinose with. (Beythien and Tollens.) (ix, 1890).....                                                           | 310                                 | Phosphates, Acid, Manufacture of. (P) Lake. From Memminger. (ix, 1890).....                              | 862      |
| Compounds of, with Sugars. (Fischer.) (iii, 1884), 325; (vii, 1888).....                                                                | 396                                 | Action of Potassium Sulphate on Metallic. (Grandeau.) (v, 1886).....                                     | 483      |
| Reactions of. (Fischer.) (ix, 1890).....                                                                                                | 50                                  | Action of Sulphur on Alkaline. (Fihol and Senderens.) (ii, 1883).....                                    | 262      |
| Use of. (Beythien and Tollens.) (ix, 1890).....                                                                                         | 310                                 | Agricultural Value of Aluminium. (Gautier.) (xiv, 1895).....                                             | 497      |
| Use of, for Detection of Sugars. (Maquenne.) (x, 1891).....                                                                             | 727                                 | Agricultural Value of Natural. (Daturel.) (xii, 1894).....                                               | 1210     |
| Phenyl-silicic Ethers. (Martini and Weber.) (ii, 1883).....                                                                             | 372                                 | Alkaline, Manufacture of. (P) Justice. From Thomas. (iv, 1885).....                                      | 674      |
| Phenylindole, Pr. 3. (Fischer and Schmidt.) (vii, 1888).....                                                                            | 559                                 | Alkaline, Production of. (P) Twynam. (v, 1886).....                                                      | 325      |
| Phenylinduline. (Fischer and Hepp.) (x, 1891).....                                                                                      | 458                                 | Alumina and Iron Oxide in Mineral, Estimation of. (Thomson.) (ix, 1886).....                             | 152      |
| Phenyl-m-oxotolylamine. (Zeza and Buch.) (v, 1886).....                                                                                 | 599                                 | Alumina, Estimation of. (Lanne.) (xiv, 1895).....                                                        | 790      |
| Phenylmethane, Distinguishing Colourless and Coloured Derivatives of Di- and Tri-. (Rosenstiehl).....                                   | (xiii, 1894), 798; (xiv, 1895), 25  | Analysis of. (Vogel.) (x, 1891).....                                                                     | 830      |
| Phenyl-naphthalene, Constitution of. (Zinke.) (vi, 1887).....                                                                           | 651                                 | And Ammonium Sulphate, Manufacture of. (P) Solvay. (vi, 1887).....                                       | 510      |
| Phenyl-ortho-oxalate. (Chapardé and Smith.) (ii, 1883).....                                                                             | 345                                 | And Slag, Manuring Experiments with. (Schouenmark and others.) (ix, 1884).....                           | 541      |
| Phenyl-piperidine. (Lellmann.) (vi, 1887).....                                                                                          | 695                                 | Apparatus for Grinding. (P) Askham. (xii, 1893).....                                                     | 913      |
| Phenylpropionic Acid. (Williams.) (viii, 1889).....                                                                                     | 305                                 | Apparatus for Reducing. (P) Wood. (iii, 1884).....                                                       | 317      |
| Phenylquinoline: A New Base of Quinoline Series. (Grimaux.) (ii, 1883).....                                                             | 423                                 | Application of Basic, to Manufacture of Soda and Potash. (P) Solvay. (i, 1882).....                      | 67       |
| Phenylrosinduline, Manufacture of Sulpho Acids of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xiii, 1894).....                 | 519                                 | Automatic Extractor for. (Horne.) (xii, 1894).....                                                       | 278      |
| Phenylsulphonic Acid, Ortho- or Aseptol. (Serrant.) (iv, 1885).....                                                                     | 688                                 | Behaviour of, to Citric Acid Solution. (von Ollech and Tollens.) (ii, 1883).....                         | 288      |
| Phenyl-thiophen. (Renard.) (ix, 1890).....                                                                                              | 276                                 | Composition of Raw Mineral. (Macadam.) (vii, 1888).....                                                  | 93       |
| Phenylurea, Production of p-Methoxy- and p-Ethoxy-. (P) Imray. From The Farbwerke vormals Meister, Lucius and Bruning. (xiv, 1895)..... | 595                                 | Containing Fluorine, Decomp. of. (Feitler.) (xiv, 1895).....                                             | 296      |
| Phenylurethane and Pyridine. (ix, 1890).....                                                                                            | 650                                 | Conversion of, into Manure. (P) Wise. From Solvay. (vii, 1888).....                                      | 508      |
| (Phenyl Carbamine Acid.) (ix, 1890).....                                                                                                | 888                                 | Conversion of, into Thermophosphates. (P) Bazin. (vii, 1888).....                                        | 684      |
| Philadelphia, Proceedings of Convention of Agricultural Chemists at, 1884. (iv, 1885).....                                              | 290                                 | Conversion of Phosphorus into. (P) Adair and Thomlinson. (ii, 1883).....                                 | 542      |
| Philippine Islands, Character of Markets of. (T.R.) (vii, 1888).....                                                                    | 356                                 | Decomposition of, at High Temp. (Grandeau.) (i, 1882).....                                               | 501      |
| Customs Tariff of the. (T.R.).....                                                                                                      | (ix, 1890), 774; (x, 1891), 391     | Determination of Reverted. (Gladding.) (i, 1882).....                                                    | 372      |
| Drug Trade in the. (T.R.) (vii, 1888).....                                                                                              | 356                                 | Dissolving Lime out of. (P) Cahen. (iv, 1885).....                                                       | 117      |
| Economic Condition of. (T.R.) (xii, 1893).....                                                                                          | 73                                  | Effect of Decomposing Organic Matter on Natural. (Lupton.) (xii, 1893).....                              | 850      |
| Phlorizin. (viii, 1889).....                                                                                                            | 413                                 | Electrolysis of Metallic. (Smith.) (xi, 1892).....                                                       | 61       |
| Phloroglucinol. (Skraup.) (ix, 1890).....                                                                                               | 410                                 | Electrolysis of Metallic, in Acid Solution. (Smith.) (ix, 1890).....                                     | 898      |
| Comp. of Vanillin with Pyrocollol and. (Etti.) (i, 1882).....                                                                           | 443                                 | Enriching Calcareous:                                                                                    |          |
| Detection of Diorescinol in Synthetical. (Herzig and Zeisel.) (ix, 1890).....                                                           | 900                                 | (P) Delahaye. (xi, 1892).....                                                                            | 161      |

(xiii, 1894) .....                                                                                         | 497                                       | Transformation of Piperidine into. (Schotten.) (i, 1882) .....                                                  | 200                                                                      |
| Puzzolana Cement: Comparison with other Cements. (Boehme.) (x, 1891) .....                                                                     | 149                                       | Transformation of Pyrroline into. (Dennstedt and Zimmermann.) (v, 1886) .....                                   | 23                                                                       |
| Pyknometer, The. (Alder Wright.) (xi, 1892) .....                                                                                              | 298                                       | Pyridimonomon sulphonic Acid. (Fischer and Riemerschmid.) (ii, 1883) .....                                      | 377                                                                      |
| Pyrazine, Manufacture of Basic Compounds derived from. (P) Newton. From The Farbenfabriken vormals Bayer. (xii, 1894) .....                    | 510                                       | Pyrites, Action of Gaseous Hydrochloric Acid on Burnt. (Blattner and Kestner.) (xii, 1893) .....                | 925                                                                      |
| Pyrazole Derivatives, Production of Oxygenated. (P) Pfleger and Krauth. (xii, 1893) .....                                                      | 463                                       | Analysis of: (Glaser.) (xiii, 1894) .....                                                                       | 1095                                                                     |
| Derivatives, Synthesis of Oxygenated. (Lederer.) (xi, 1892) .....                                                                              | 368                                       | (Jannasch.) (ix, 1890) .....                                                                                    | 110                                                                      |
| Pyrazolone Reaction. (Knorr.) (xii, 1893) .....                                                                                                | 466                                       | And Brimstone, Comparative Value of. (Kelly.) (xi, 1892) .....                                                  | 514                                                                      |
| Pyrazolone Derivatives, Prod. of. (P) Imray. From The Farbenwerke vormals Meister, Lucius und Brünning. (xii, 1893) .....                      | 784                                       | And Brimstone, Returns relating to. (Chance.) (vii, 1888) .....                                                 | 169                                                                      |
| Ethoxyphenylmethyl, Manufacture of. (P) Imray. From The Farbenwerke vormals Meister, Lucius und Brünning. (xii, 1893) .....                    | 288                                       | Apparatus for Burning Small. (P) Finch and Willoughby. (iii, 1884) .....                                        | 173                                                                      |
| Nitro- and Amidomethylphenyl, Manufacture of. (P) Imray. From The Farbenwerke vormals Meister, Lucius und Brünning. (xi, 1892) .....           | 545                                       | Apparatus for Extracting Sulphur from. (P) Henderson. From Lebois. (iv, 1885) .....                             | 497                                                                      |
| Para-ethoxy-1 Phenyl 2: 3, dimethyl-5. Manufacture of. (P) Imray. From The Farbenwerke vormals Meister, Lucius und Brünning. (xii, 1893) ..... | 288                                       | Apparatus for Separating Crushed. (P) Searles. (vi, 1892) .....                                                 | 323                                                                      |
| Para-tolyl dimethyl, New Derivative of. (P) Riedel and Thoms. (xii, 1893) .....                                                                | 546                                       | Apparatus for Treating. (P) Hargreaves and Robinson. (vi, 1887) .....                                           | 368                                                                      |
| Preparation of 1-Phenyl-2, 3-Dimethyl-4-Oxy-5. (Knorr and Pechorr.) (xiv, 1895) .....                                                          | 987                                       | Arsenic in, Estimating. (Clark.) (vi, 1887) .....                                                               | 352                                                                      |
| Production of a Novel. (P) Imray. From The Farbenwerke vormals Meister, Lucius und Brünning. (x, 1891) .....                                   | 1027                                      | Arsenic in Spanish. (Fulton.) (v, 1886) .....                                                                   | 296                                                                      |
| Reactions. (Rothenburg.) (xiii, 1894) .....                                                                                                    | 765                                       | Burner Gases, Testing. (Lunge.) (ix, 1890) .....                                                                | 1014                                                                     |
| See also under Phenyl dimethylpyrazolone.                                                                                                      |                                           | Burner, Utilisation of Heat of Gases from. (Lunge.) (viii, 1889) .....                                          | 879                                                                      |
| Pyrazolones, Manufacture of. (P) Imray. From Rohringer Sohn. (x, 1891) .....                                                                   | 792                                       | Burners for, in United States. (Martyn.) (iv, 1885) .....                                                       | 26                                                                       |
| Pyrene. (Bamberger and Philip.) .....                                                                                                          | (v, 1886), 449, 595, (vi, 1887), 135, 651 | Burners. See also under Chamber Kibns. Cause of Deception in Samples of "Explosive." (Blount.) (iv, 1885) ..... | 674                                                                      |
| Amido- and Nitro-. Preparation of. (Goldschmidt.) (i, 1882) .....                                                                              | 62                                        | Chemical Disaggregation of. (P) Body. (xiv, 1895) .....                                                         | 973                                                                      |
| Constitution of. (Bamberger and Philip.) (vi, 1887) .....                                                                                      | 506                                       | Clark's Process for Estimation of Sulphur in. (Lunge.) (iv, 1885) .....                                         | 449                                                                      |
| Derivatives of. (Goldschmidt and Wegscheider.) (ii, 1883) .....                                                                                | 266                                       | Composition of Gases from Combustion of Iron. (Scheurer-Kestner.) (iv, 1885) .....                              | 457                                                                      |
| Pyrenic Acid. (Bamberger and Philip.) (v, 1886) .....                                                                                          | 449                                       | Condition of Gold in.
